

Azure Deployment & Migration Services

Start your migration process by choosing the right solution that's best for your business.

Cloud computing plays an integral role in the modernization of IT structures. On top of that, it has and continues to act as a catalyst for digital transformations with many organizations.

Due to the cloud's increasing business agility, reliability, and flexibility, it is predicted that more and more organization will be migrating to cloud. The question is, are you ready to migrate? When is the right time to do?

Now is the time! Move your data and infrastructure to Azure using a cloud migration plan that will help your organization flip capital expenditures to operational expenditures and quickly gain agility and scale to make the most of your new working environment.

Migration on-premise App to Azure (IAAs)

- On-premise Apps/Web Server and Database to Azure VM
- Active Directory Synchronization to Azure AD
- Active Directory Domain Service

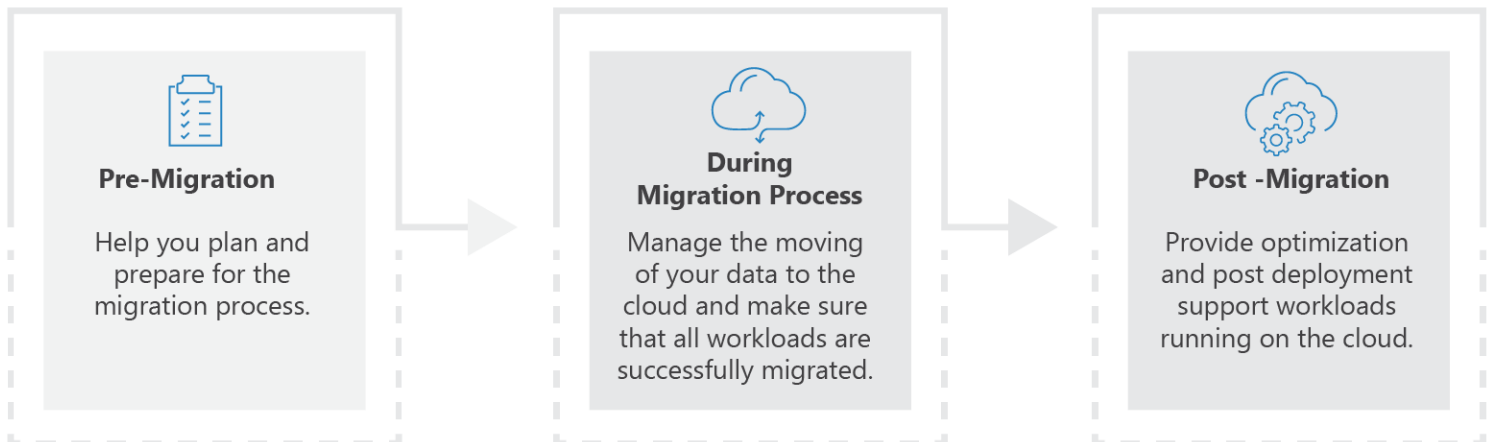

Windows Virtual Desktop on Azure

- Set up Windows Virtual Desktop in minutes with the new scalable multi-session Windows 10 experience

Host Server in Azure

- Run your applications on right virtual machine Windows or Linux VMs

WSI's Azure Migration Services support your organization in your journey to the cloud.

BENEFITS
