Security-Baseline Integrity Manager

In the ever-evolving landscape of Microsoft 365/Intune, maintaining robust security standards is a challenge. That's where Security-Baseline Integrity Manager comes in. Here's why our solution is the right choice for your organization:

1. The Business Case

**Configuration Drift Management:** Stay informed with daily alerts for any policy changes.

Internal Auditing and Accountability: Keep IT staff accountable and ensure all security measures are properly implemented and maintained.

Staying Updated with Microsoft Policies: Stay aware of deprecated policies by Microsoft, ensuring your security measures are always up-to-date.

Enhanced Security Posture: Mitigate the risks associated with configuration drift and enhance your overall security posture.

- huntington.org (Not supported for Update)

2. Key Features

Daily Emails: Stay informed with daily status updates of your security policies.

Monthly Report: Get a comprehensive summary of the changes made to your security policies over the past month.

Monthly Snapshot of Settings Monitored: Understand the current state of your security configurations with a monthly snapshot.
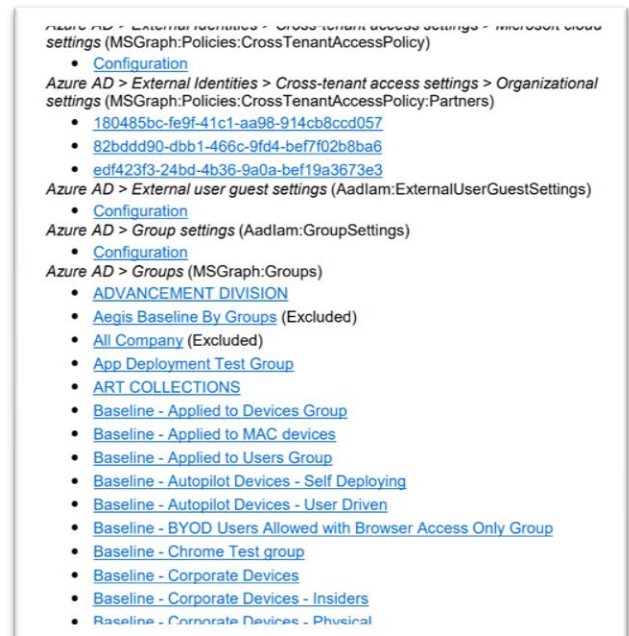

User Accountability: Track all changes made to the security policies, including who made the change and when it was made.

Support for Multiple Tenants: Versatile solution for organizations with multiple Microsoft 365/Intune environments.

On-Demand Snapshot Requests: Request a snapshot of active policies at any time.

AEGIS INNOVATORS

Security-Baseline Integrity Manager

Security-Baseline Integrity Manager is a specialized security service designed to safeguard your Microsoft 365/Intune environment. It diligently monitors your security policies, ensuring consistent adherence to the Aegis Zero Trust security baseline that is heavily based on NIST 800-171 standards.

3. Benefits

⚠️ Alerts when policy changes are made from a baseline

✓ Helps with staying aware of deprecated policies by Microsoft

👤 Identifies the user who made a policy change and when they made it

Supports multiple tenants

Compliance Assurance

Reduced Operational Overhead

👁 Enhanced Visibility
