

Proactively Monitor Your Network With Microsoft's Data Solutions.

With Azure services and Power BI, data processing efforts can be turned into analytics and reports that provide real-time insights into a business. Whether data processing is cloud-based or on-premises, straightforward or complex, single-sourced or massively scaled, warehoused or real-time, Azure and Power BI have the built-in connectivity and integration to bring your business intelligence efforts to life.

What is BSM?

Wragby's BSM is a solution built on Microsoft Azure Application Insight, OMS and Power BI. With this solution you can collect, correlate and search your system and application data, gain insight across on-premise and cloud infrastructure, create alert and remediate possible failure through automation.

Benefits of BSM

- Proactive Network Monitoring
- Meet Consumers Needs
- Reduce Cost of Service

"We had stringent operational SLAs from regulators, coupled with network bottleneck which could not be easily identified.

Wragby deployed their Business Service Monitoring (BSM) Solution and within a month we have been able to identify and resolve all bottlenecks while meeting regulatory SLAs"

- Ebenezer Ahisu CIO Sterling Bank Nigeria

Infrastructure Availability

- Real Time Performance Data Collection
- Patch and Update Management
- Network Performance Monitoring

Application Monitoring

- Insight on Application Performance
- Diagnose Trace and Debug Failure in Near Real Time
- Be Proactive: Find Bottleneck and Optimize your Application Performance

Visibility and Cost Saving

- All data centralized, consolidated and available
- Ability to create custom dashboard
- Reduce support cost by exposing configuration and operational issues before they affect your business

How Wragby's BSM Helps You Achieve Business Benefits

- Eliminate Network Bottlenecks
- With Proactive Monitoring you can achieve up to 99.999% Network Availability
- Meet Consumers needs

- Utilize Solution built on tried and tested applications
