

Next-generation technologies to future-proof your business

Our offerings are built for enterprises that want high performance, increased flexibility, and lower costs. Today, hundreds of the world's largest corporations, leading universities, and governments rely on our open-source, cloud-native, and uniquely extensible products and industry solutions. Together, we execute in excess of 18 trillion transactions, expose more than 200,000 APIs, and manage over 100 million identities every single year.

The WSO2 Advantage

Unlock New Opportunities

Reap the benefits of digital transformation to deliver enhanced services, applications, and experiences.

Accelerate Time-to-Market

Deploy solutions swiftly and respond to market changes rapidly to deliver your core value proposition through digital products.

Save Costs

A competitive pricing structure that doesn't mean sacrificing key features or performance.

Microservices, Containers, and Beyond!

Extensibility to provide enhanced offerings for your customers today – and over the years to come.

What We Offer

Choreo

Using the Choreo integration-platform-as-a-service (iPaaS), developers can engineer in low-code and code simultaneously; build, test, and deploy in Kubernetes; manage APIs; share them in a marketplace; and observe performance – all within hours not weeks.

Asgardeo

The Asgardeo identity-as-a-service (IDaaS) provides automated, cost-effective scalability, reliability, and agility, so developers can focus on creating great digital experiences. Bring CIAM best practices and workflows into cloud-native applications via a range of templates and other no-code and low-code options – without having to become a security expert.

WSO2 API Manager

Harness the full power of your APIs to optimize business performance. With our fully open-source, full lifecycle API management solution, your teams spend less time coding and more time building great digital products.

WSO2 Identity Server

Effectively build API-driven CIAM solutions that delight customers with a reliable, flexible, and future-proof identity platform. Implement access management with consistent security for users while maintaining compliance with privacy and data regulations.

WSO2 Open Banking

Our purpose-built solution, which is built on top of our industry-leading products, speeds regulatory compliance, reduces outcome risk, and facilitates API-led digital initiatives.

WSO2 Open Healthcare

WSO2's solution goes beyond basic accelerators to provide a complete platform for fast-tracking API-driven compliance, healthcare interoperability, and digital business innovation.

WSO2 Strategic Consulting

We help organizations to streamline their business objectives and rapidly achieve key results. Design, build, and operate agile and innovative systems that provide seamless digital experiences.
