cloud9™
by VoIP Networks

One single provider. One integrated solution. Endless possibilities.

Imagine what you could accomplish if you didn't need to worry about your phone system.

Running a business is complicated enough with having to worry about the basics. Communications systems should just work – no muss, no fuss – so you can concentrate on growing your business.

Unified Communications

cloud9 ∞™
by VoIP Networks

One single provider.

But the reality is that communication systems can be complicated, costly and confusing because most cloud-based IP phone system providers don't deliver the whole package. You are left to figure out Internet access, on-premise installation or where to buy your phones. Multiple technologies, suppliers and invoices equal multiple headaches.

Cloud9 by VoIP Networks™ handles everything for you. The result is a single provider that is responsible for ensuring that everything you need is in place and working properly. What that means for you is:

• One point of responsibility
• No finger pointing when issues arise
• One point of contact
• One easy-to-understand invoice.

One integrated solution.

When you deal with one end-to-end cloud-based IP communications system vendor, you also get a single integrated solution that meets your needs.

Understanding your business and your needs: We start by understanding your needs and how cloud-based telephony and unified communications can improve your business. VoIP Networks will conduct a detailed project meeting / focus group meeting with key personnel from your organization to determine how your phone system will operate for each location, design an IP addressing scheme / network topology for the data network, recommend features based on your needs and identify project goals and time-lines.

Configuring the right solution: We then match your needs to a custom configuration of phones, mobile applications, cloud fax services, PC-based software phone, unified communications, call center / call recording applications, on-premise LAN equipment, storage, network management tools, SIP trunks, local / long distance services, Wide Area Network (WAN) circuits, broadband Internet access and FREE programming changes for the life of your contract.

Installing and training: We next come to your location to install everything required and train your staff on how to get the most from Cloud9's cloud-based IP communications systems.

Helping you save money: Let the savings begin! With all the intelligence and processing done in the cloud, Cloud9 saves you capital and on-going software and hardware maintenance costs.

Endless possibilities with Cloud9

The future is in the cloud and Cloud9 is designed to get you there. Imagine the possibilities.

Save money and improve your communications experience

Cloud9's inclusive and predictable per-user subscription pricing means that you get everything you need for one low price with no hidden fees and no surprises. Cloud9 eliminates expensive capital costs for phones and other equipment and bundles it into one subscription rate that's easy on your operational budgets. Add, delete or move users at no cost. And even better, Cloud9 nation-wide footprint gives you unlimited long distance calling throughout the US and Canada.

Drive your business with rich features

Think you need an on-premise system to get rich features? Cloud9 builds on our 30+ years of on-premise solutions experience and puts it into the cloud. Now you can have all the rich features of an on-premise solution plus all the flexibility, scalability and manageability of the cloud. Cloud9 is based on Mitel's leading unified communications platform to give your employees access to the best in communications tools, including:

- Multi-party audio conferencing
- Web conferencing and collaboration
- Visual voicemail
- Unified messaging
- Mobile twinning
- Multi-level auto attendants
- iPad, iPhone, Android, & BlackBerry apps
- Call recording
- Unified communications
- Enterprise intercom dialing
- Caller ID
- Call history
- and hundreds of other features.

### Welcome to the future of your business on Cloud9

As your business changes and grows, Cloud9 keeps up. You don't need to worry about how much capacity your communications system has or how to add new users. You have the complete flexibility to add and change users as your business expands. Intuitive, customizable and easy-to-use web management tools mean your users can take full advantage of Cloud9, and you are assured that you're accessing the latest technology innovations to drive your business. And if you don't want to worry about managing users, we'll do that too – for free.

The future of your business on Cloud9.

Endless possibilities.
