

## When there's a Bill, there's an Intelligent Way.

Powering Intelligent Spend Automation  
with Deep Learning Vision

Move beyond RPA and experience the power of APA with ENIGMA<sup>2.0</sup>, a software solution that adapts, scales, and evolves with you.

Robotic Process Automation (RPA) is the use of software "robots" who perform the same way every time and don't learn from one repetition to another. AI Process Automation in Enigma<sup>2.0</sup> first learns your business processes (acquiring information), improves them (using context and rules) and finally, performs intelligent internal self-correction (learning from successes and failures) to enable immediate action.

### SELF- LEARNING

Our AI never stops learning. Corrections made in reviewed documents are remembered and used for immediate future use.

### HIGHLY ACCURATE

Pre-trained AI models and our continuous training and maintenance protocols ensure that ENIGMA<sup>2.0</sup> stays the most accurate in the market.

### END-TO-END

It seamlessly connects to your ERP or other systems quickly and easily with pre-built connectors and standardised REST API integrations.

### COMPLIANT

Every government and business has its own way of doing things. ENIGMA<sup>2.0</sup> ensures compliance in a variety of ways: technical, tax, legal, and data.

Manual invoice data entry and traditional OCR solutions are slow, expensive, and error-prone. Most importantly, they waste valuable human time and talent. ENIGMA<sup>2.0</sup> uses unique deep learning-infused computer vision technology that reads invoices in a way that ensures fast invoice data capture and produces real-time insights with greater accuracy on every use.

One platform, many bills, complete control- our AP and AR solutions embed intelligent decision-making in its heart to power your people to deliver faster, better outcomes.

# Enigma<sup>2.0</sup>

## eInvoicing

Automate all of your invoices.  
Creating efficiencies across your  
invoice-to-pay lifecycle.

Propelled by the goal of decreasing payment cycle times & costs - seamlessly process invoices in half the time, with zero paper. It's refreshingly intelligent and designed for convenience and compliance.

**SANDBOX  
ENVIRONMENT**

**API-LED  
CONNECTIVITY**

**MULTI-FORMAT  
SUPPORT**

**VISUAL ANALYTICS  
& REPORTS**

## AP Automation

Automate capture, recognition, field extraction,  
and validation of data

Enigma<sup>2.0</sup>'s solution makes straight-through processing of PO-based invoices a reality. It eliminates the costs, errors, and physical work involved in processing invoices. Automate your procure-to-pay process to gain real-time insights and take control of your cash flow.

### **FASTER INVOICE PROCESSING**

Increase invoice processing times by 80%, leading to fewer late payments and more opportunities to take advantage of early payment discounts.

### **ACCURATE & ON-TIME**

Deliver accurate, on-time supplier payments by using augmented AI technologies such as machine learning, neural networks, and natural language processing.

### **ERROR & FRAUD DETECTION**

Surge cost savings by detecting invoice errors such as fraudulent activity and duplicate invoices before they enter your ERP system.

### **SMARTER & FASTER AP**

Receive documentation from different inputs - central and distributed locations providing an end-to-end, smarter, faster accounts payable automated workflow.

## AR Automation

Connect your financial system to ENIGMA<sup>2.0</sup> to send digital invoices directly to your customers, irrespective of their service provider or network they use. Automate your order-to-cash process to gain real-time insights and take control of your cash flow.

### REDUCE COSTS

Because time is money, eliminating lengthy manual AR procedures immediately results in savings.

### IMPROVE CUSTOMER COLLABORATION

Simplify company transactions and streamline communication for a better reputation with your consumers.

### AVOID ERRORS

No more rejected documents— errors are detected for repair before they reach your clients. Enables real-time response while handling multiple clients and complex systems.

### IMPROVE WORKING CAPITAL

Offers guaranteed and fixed DSO on all receivables, shaving days off DSO and eliminating delinquency. Eliminate late payments due to disputes and reduce bad debt.

## Security

Keep your entire organisation safe and compliant. Enigma<sup>2.0</sup> provides enterprise-level security features and procedures.

- Support ISO, SOC 2 Type 1, and IRAP compliance
- Perform granular role and user control
- Maintain thorough audit trails and records for each document

## Sustainability

Aside from the numerous commercial benefits of eInvoicing, each electronic document that goes through our network directly contributes to a more sustainable environment, resulting in a long-term, beneficial effect.

By making the move, your enterprise minimises paper use, eliminates emissions from physical (postal) delivery services, and has the flexibility to manage your business from any location, office, or home.
