

Azure Cloud Migration Services: 1-Week Assessment

We at Xekera, empowers our customers to migrate their cloud with high security and compliance and avoids all the hurdles that delay the migration process.

There are many cloud computing platforms out there in the market that has many services, but which one suits you, this is where we come in.

Xekera's professional Cloud Migration team is ready to assist your organization with cloud migration requirements. With the cloud, you can boost your services' scalability, availability, backup storage, disaster recovery and redundancy, and much more!

In one week, what will be accomplished?

1. Determine the project/business objectives, budget constraints, and timeframes.
2. To determine migration priorities for on-premises applications, assess the client's current on-premises services to determine dependencies across all applications.
3. Examine how on-premises applications can be maintained and improved by using Azure's networking, storage, scalability, and security features.
4. Identify and document the knowledge gaps within the organization and schedule cloud training sessions.
5. Identify the challenges in the legacy system, and the expected architecture; develop a project transition plan aligned to those elements.
6. Create a detailed plan based on the assessment studies, calculate timelines for the migration criteria in Azure and estimate effort to accomplish them, and map legacy services to targeted Azure services.

Deliverables:

1. An application modernization strategy involving automation, cloud elasticity, and cost optimization.
2. A backup and disaster recovery plan that considers backup automation and data retention policies.
3. A detailed migration plan including configuration and timelines of Azure resources, a security analysis of the current state and configuration, and detailed instructions for the implementation process.

WHY AZURE?

- Microsoft Azure Cloud is trusted by 90% of Fortune 500 businesses. Of all the cloud service providers, Azure provides the most robust compliance coverage.
- Virtual Machines, Storage, Databases, Backup, Azure Active Directory, Analytics, and more are among the 100+ resources available in Azure Cloud.
- Switching to Azure saves about \$12 million a year, according to Forrester Consulting.

Benefits of Azure

- Month-to-Month Contract basis with no upfront costs
- On the fly, add, remove, and scale up or down your resources
- Only you and your trusted ones can access your Data Center from a single web page.
- Use the Azure Cloud, which is trusted by 95% of Fortune 500 companies and has a 99% uptime guarantee from Microsoft.
- For Windows Server and SQL Server, Azure Cloud is 5 times less expensive than AWS.

What We Offer

- Server Data Backups
- Disaster Site Recovery
- Data Center Migration
- Development Services
- Rearchitecting Services
- Refactoring/Rebuilding/Rehosting

Why Choose Us

Our team at Xekera Systems Inc. helps enterprises replace legacy systems and processes. This includes migrating their IT infrastructure and on-premises applications to the cloud, building new cloud-based applications and utilizing cloud services effectively.
