Avail FREE* PowerApps Customization Assessment

* Upto 25 man-hours effort

Why adopt PowerApps?

Quick Turnaround for your automation
PowerApps is a suite of apps, services, connectors & data platform that provides a rapid application development environment to build custom apps for your business needs. Using Power Apps, you can quickly build custom business apps that connect to your business data stored either in the underlying data platform or in various online and on-premises data sources.

Secured Environment
PowerApps applications are part of Office 365 ecosystem and uses O365/Azure AD for identification and authentication. No need to create or manage new users & logins. All security policies extend into these apps

Mobile Access
Users on the move or who need to be on-field need not have to take notes of day-to-day actions and updated into a desktop/laptop end of day. They can capture information in realtime with immediate feedback and processing for subsequent stages.

Cost Effective
Cost involved for development is much lesser compared to creating native Android or IOS application to achieve mobile apps. Also improvements become affordable and feasible.

Xencia Offer

PowerApps assessment for the process automation for the business

Demonstrating expected capabilities and/or build prototype wherever necessary

Availability of application in both the desktop and mobile platforms

Rapid application development & workflow automation using Microsoft Power Platform.
