# A TAILORMADE **BACKUP** PLAN FOR YOUR SPECIFIC NEEDS

- IT-security is getting more and more complex with rising threats and increased regulatory requirements. This makes it more important than ever to take actions and have a strategic well thought out plan for your Backup.
- A 90-day backup is included in Microsoft 365. Thereafter, you need to take active choices of which security level your business shall have.
- Microsoft's services include short-term protection against operational disturbance and have a limited recovery period. Xenit Microsoft 365 Backup is the perfect complement, we give you a complete backup plan and protection for malware, ransomware and a longer data recovery period.
