

WELCOME TO XENIT

Microsoft 365 Copilot

Are you curious about how your organization can benefit from Microsoft 365 Copilot? Xenit is a comprehensive provider and can support you with everything from user training and technical implementation to strategic advice on your information management.

HOW WE DO IT

WORKSHOP

Through an interactive workshop, you will explore and identify how Copilot can be utilized in your specific environment, as well as map out the challenges you face. The workshop will focus on three perspectives: technology, users, and organization.

PILOT

Building on insights from step 1, together we select a pilot group and begin testing M365 Copilot in your operations to gain a clear understanding of how the tools can contribute to streamlining the workday. We'll also explore how Copilot interacts with your data structure.

IMPLEMENTATION

It's time to implement Microsoft 365 on a larger scale! Together, we ensure that you can benefit from Copilot in a secure, user-friendly, and organizationally tailored manner.

M365 Copilot Workshop

If you're interested in exploring the possibilities with Microsoft 365 Copilot, we offer the workshop "Get Ready for M365 Copilot." With this workshop, you'll gain a comprehensive understanding of how to prepare your organization from both a technical and user perspective. The workshop includes:

- Introduction to Copilot for M365
- Technical requirements and integration with your M365 environment
- Demonstration and use cases
- Identifying and prioritizing your challenges and desired benefits
- How to conduct a successful pilot
- Discussion on your challenges and desired advantages
- Next steps

M365 Copilot Pilot

To harness the power of Microsoft 365 Copilot, technology, people, and organization need to collaborate. In our pilot projects, both technical resources and productivity consultants always participate to ensure that both perspectives are covered. The pilot includes:

- Kick-off meeting and development of personas
- Support in installation and configuration of Copilot
- User training
- Testing of functionality, performance, and security
- Gathering feedback
- Final report and recommendations

M365 Copilot Implementation

It's time to implement Microsoft 365 on a larger scale! Together, we ensure that you can benefit from Copilot in a secure, user-friendly, and organizationally tailored manner. We build the implementation plan based on your specific needs. The plan may include:

- System integration
- Organizational adjustments
- Security measures
- User support and training
- Governance and compliance review

THANK YOU!
