Foundational Landing Zone Assessment

Introduction

We know that every business is unique, so moving to the cloud requires a solid foundation as well as an Azure environment that is perfectly tailored to your unique needs. And that is whether it´s migrating existing applications or creating new ones. And this is exactly where the development of architectural design is of fundamental importance.

Our Cloud Landing Zone Assessment helps you assess your current target architecture and helps you define your unique landing zone infrastructure.
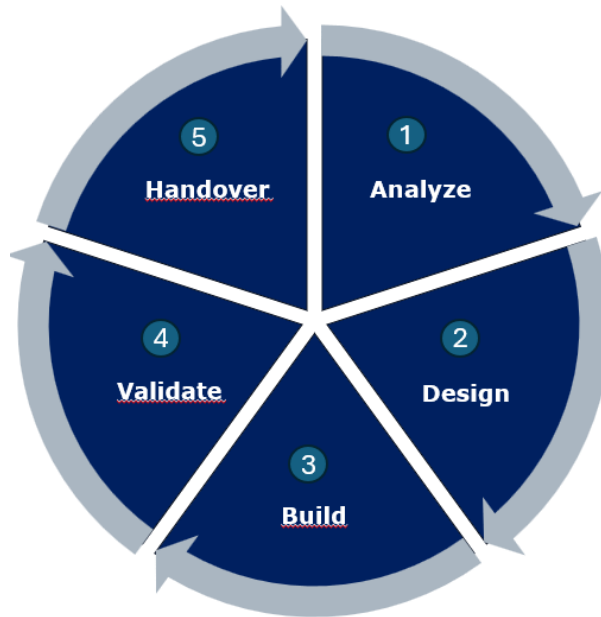

Objectives

- Get your unique landing zone infrastructure
- Improve security, compliance and governance
- Get ready for migration to Azure
- Optimize existing Azure environment

Overview

Analyze	Design	Build	Validate	Handover
