Are you tired of sifting through endless patent search results, wasting valuable time and resources? Goodbye inefficient searches, introducing **Invalidator LLM** – your ultimate automated invalidation search solution.

## Why choose **Invalidator LLM**?

**90%**

90% more accurate than free patent search tools

**66%**

66% of citations in IPR cases were identified by Invalidator LLM

**40%**

40% more accurate than paid alternatives

**TOP  
50**

Presents the most relevant references as the Top 50 results

Detailed Claim to Prior Art Mapping with AI-generated Explanation of Mappings

Comprehensive Global Patent and NPL Coverage

## Our **Proprietary** Technology

**Para  
Embed™**

Harnessing the power of vector embedding and retrieval alongside a finely tuned LLM trained on comprehensive patent and technology data

## MYRIAD USE CASES FOR **INVALIDATOR LLM**:

Conduct quick searches for litigation pitches

Perform validity checks before patent acquisition

Find prior art against asserted patents

Conduct pre-licensing validity checks

## SAMPLE OUTPUT

### Detailed Mapping of Prior Art to Claim Elements

Patent list ↓↑	Domain/Title ↓	KF1 ↓↑	KF2 ↓↑	KF3 ↓↑
<p><b>IN-2008CN03710-A</b></p> <p><b>Title:</b> A FORMING TOOL FOR MAKING FIBRE OBJECTS</p> <p><b>Abstract:</b> The invention relates to a forming tool 1 for forming fibre products. The forming tool according to the invention comprises a permeable shell 3 with an internal 5 that is filled with loose objects 6 such as sph <a href="#">Read more &gt;&gt;</a></p> <p><b>Publication Date:</b> 13 Mar 2009</p> <p><a href="#">Summary &gt;&gt;</a></p>	<p><b>97</b></p> <p>a forming tool for making fibre objects</p>	<p><b>81</b></p> <p>1. A forming tool (1) for fibre objects, the tool (1) comprising a permeable shell (3) of sintered particles (4), the shell (3) partially enclosing an inner</p> <p><a href="#">Read more &gt;&gt;</a></p>	<p><b>82</b></p> <p>1. A forming tool (1) for fibre objects, the tool (1) comprising a permeable shell (3) of sintered particles (4), the shell (3) partially enclosing an inner</p> <p><a href="#">Read more &gt;&gt;</a></p>	<p><b>78</b></p> <p>In embodiments of the invention, the permeable cover may be removably attached to the permeable shell.</p>
<p><b>US-7878787-B2</b></p> <p><b>Title:</b> Forming tool for making fibre objects</p> <p><b>Abstract:</b> The invention relates to a forming tool for forming fiber products. The forming tool according to the invention comprises a permeable shell with an internal cavity that is filled with loose objects such as : <a href="#">Read more &gt;&gt;</a></p> <p><b>Publication Date:</b> 01 Feb 2011</p> <p><a href="#">Summary &gt;&gt;</a></p>	<p><b>100</b></p> <p>forming tool for making fibre objects</p>	<p><b>82</b></p> <p>The invention relates to a forming tool for fibre objects. The inventive tool comprises a permeable shell of sintered particles. The</p> <p><a href="#">Read more &gt;&gt;</a></p>	<p><b>100</b></p> <p>a permeable shell formed from sintered particles, the shell partially enclosing an inner cavity of the tool which is filled with loose objects that are</p> <p><a href="#">Read more &gt;&gt;</a></p>	<p><b>82</b></p> <p>enclosing the cavity with a permeable cover that together with the permeable shell encloses the cavity such that the loose objects are</p> <p><a href="#">Read more &gt;&gt;</a></p>
