xMentium

AI – Powered Language Hub

Right Words, Right Away

The Opportunity

For decades organizations have spent 100s of Millions on IT projects for workflows and data management

...while not seeing that the language that captures their core knowledge and intentions is managed manually and poorly

This is about to change. AI has opened the door for a step-function business improvement based on changing how language is created, managed, and shared.

xMentium

- Language tasks account for 62% of total time worked in the US.

- Of those, 65% of language tasks have high potential to be automated or augmented by LLMs.

- As a result, nearly 40% of all working hours across US industries can be impacted by LLMs.

Language is on the critical path for almost every business process

xMentium and Microsoft provide a secure and reliable way for companies to manage enterprise language. Leverage GPT's power using Microsoft OpenAI and xMentium's AI-powered Language Hub SaaS platform.

Primary challenges

It's critical to establish a solid language foundation before integrating **GPT due to both its potential and limitations.**
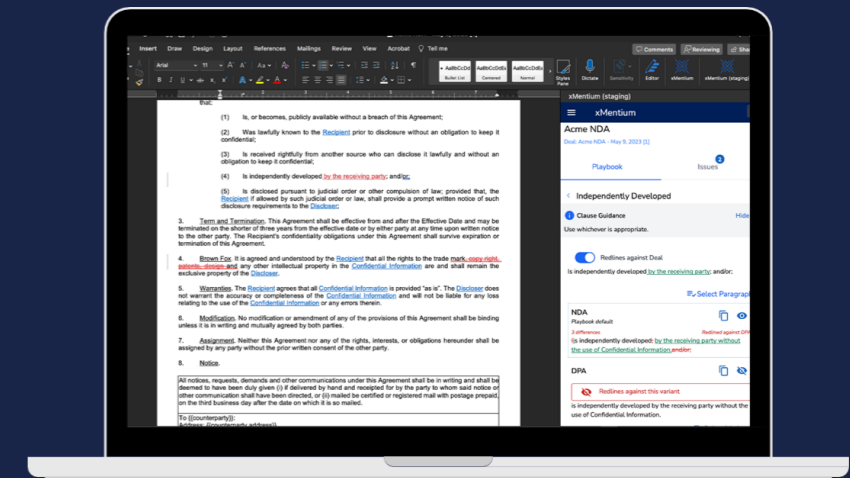

Ideal solution

xMentium enhances GPT with custom AI and a language database to generate and retrieve clause level language that **precisely meets each corporation's approved language**.

Outcome

In < 6 weeks, achieve success with xMentium's language hub on a use case of your choice, e.g., contracts. Utilize xMentium experts to scale to additional use cases.

xMentium

Realize AI Powered Business Breakthroughs

**Organize Your Language** Transform your documents, templates, playbooks, and handbooks into manageable, valuable, and shared building blocks

Get on the Path to Practical AI Success Unlock the promise of GPT by integrating with secure and reliable Azure OpenAI to generate and retrieve your approved language

Start Fast, Then Scale Implement xMentium's AI-powered Language Hub and blueprint for GPT implementation, supported by experts with decades of language, data science and business transformation experience

Native web view or work in Office 365 and MS Word
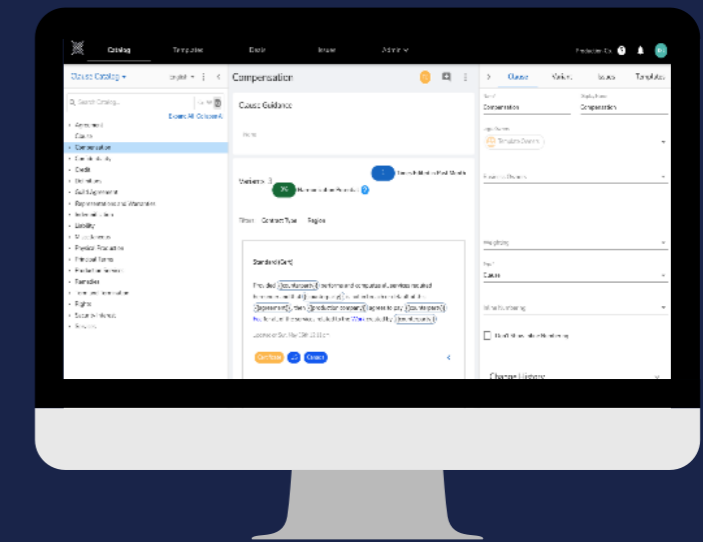

A Language Hub to share your organizations' best granular language, positions and guidance

6 Weeks to Enterprise Language Success

Expand Business Use Cases

- ✓ Expand Use Cases & Language
- ✓ Expand Prompt Strategies

6

Pilot, Rollout & Govern

- ✓ Pilot & Rollout Initial Use Case(s)
- ✓ Incorporate Feedback

5

Organize Language & Optimize GPT Prompts

- ✓ Import Templates & Harmonize Language
- ✓ Optimize GPT Prompts

4

Extend Microsoft's Platform

Configure Teams & User Environment

- ✓ Setup Teams & Roles
- ✓ Configure tools, user processes & data flows

3

Word

Configure GPT Language Platform

- ✓ Configure xMentium Platform
- ✓ Confirm Azure OpenAI Connection & Security

2

Power Platform
Data & Tools

Microsoft Dynamics — Dynamics

Determine Use Cases

- ✓ Determine Use Cases & Business Value
- ✓ Identify Team and Language Content
