Preparing your Microsoft 365 Environment for Copilot with Xperta Copilot Readiness Check

Service Overview: Xperta evaluates your Microsoft 365 tenant, ensuring a secure and efficient deployment of Copilot for Microsoft 365. Our comprehensive assessment covers:

- **Usage Analysis:** Evaluating how your organization utilizes Microsoft 365.
- **Sensitive Data Identification:** Locating information that is sensitive for your organization.
- **Stale Content Review:** Providing information of outdated and unnecessary data.
- **Data Access Audit:** Verifying that appropriate access controls are in place.
- **Security Evaluation:** Addressing potential vulnerabilities.

Deliverables: Post-assessment, Xperta provides:

- A detailed report on your security and compliance status.
- Tailored recommendations for immediate improvements and a strategic roadmap.
- Clear action steps for a successful pilot and broader rollout of Copilot for Microsoft 365.

With Xperta, gain clarity on your current state and the path forward to a more secure and compliant Microsoft 365 experience.
