Azure Cloud Accelerator Workshop

We are *Xpirit*. We build Engineering Cultures

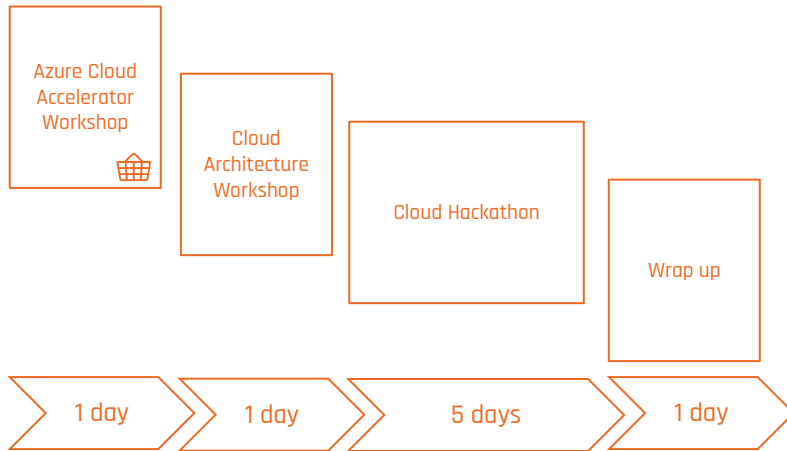

Azure Cloud Adoption Program

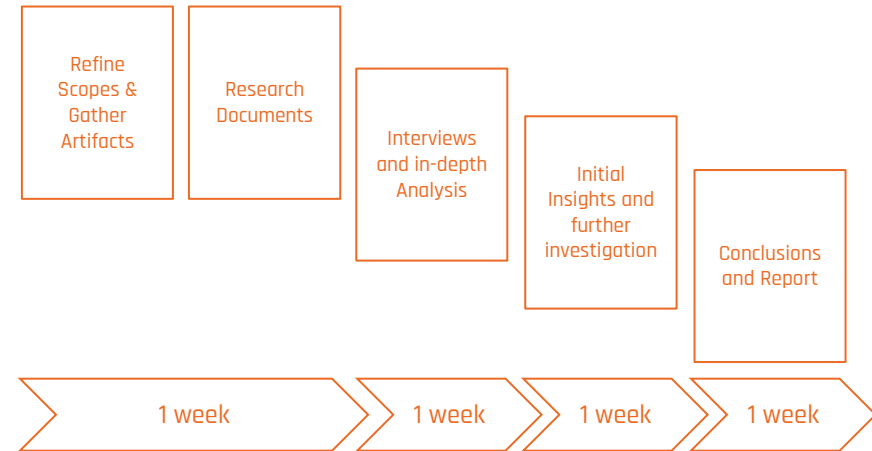

Azure Cloud Exploration Workshop

Azure Cloud Acceleration Hackathon

Cloud Readiness Scan

1 Day Azure Cloud Accelerator Workshop

Kick start your cloud journey

- > As a part of our Azure Cloud accelerator Bootcamp and a separate proposition, we offer you our Azure Cloud accelerator workshop.
- > In this workshop, we will discover your company and application in more detail. We will start by exploring your application landscape and revisit the business goals you have in mind. Next, we will explore the stakeholders within your company to determine the business value of your applications.
- > After that, we will explore the risks and requirements we have to consider. After that, we combine these insights to create a value/complexity matrix to map the suitable application of your landscape.
- > We will end the day by discussing some high-level architecture of the application and making a choice for an application that you can bring to Azure.

Program

- Discover Application landscape exploration
 - Current Architecture
- Evaluate Business Case
 - Sense of Urgency
 - Stakeholder map
 - Business Value
- High level Risk Management
 - Security
 - Compliance
 - Ility
 - Risk of Cloud impact analysis
- Set up Risk/Value Matrix
- Application mapping to Risk/value matrix
- Create Value/Complexity Matrix
 - High level architecture discussion
 - Migration Strategy, no lift and shift
- DiscoverTool landscape + Prerequisites
- Align on expected Results and next steps
