# Managed GitHub Enterprise Server

We are *Xpirit*. We build Engineering Cultures

# Managed GitHub Enterprise Server

- > Enabling your teams to collaborate successfully. Automate more, deliver faster, and continuously improve. With our Managed GitHub Enterprise Server solution, hosted or cloud-native, you can take your team's velocity and productivity to the next level. Secure and compliant throughout the process, supported by our GitHub experts. We are Europe's first GitHub Verified Partner.
- > Secure your supply chain, your code, and your software lifecycle.
- > Automate more, deliver faster, and continuously improve your workflows.
- > Guaranteed data residency in the EU.
- > Up and running within one week for new implementations, or within two weeks when coming from a previous GHES version.
- > Automate every step of your pipeline, including powerful, flexible CI/CD native to GitHub.
- > Connect with existing identity providers using Single Sign On (SSO).
- > Onboarding of the first five engineers included in the initial implementation.
- > Engage with Xpirit as your Cloud Solution Provider or bring your own licenses.

## Our Approach

### Step 1

Assessment of current and desired state.

### Step 2

Initial implementation or migration to GHES.

### Step 3

Onboarding in our (24/7) DevOps team.

### Step 4

Optimize CI/CD and improve collaboration.
