

**EXECUTIVE
AUTOMATS**
GENERAL PRESENTATION

The logo for Executive Automats is contained within a teal rectangular border. It features a stylized teal arrow graphic pointing to the right, followed by the words "EXECUTIVE" and "AUTOMATS" in a bold, sans-serif font. "EXECUTIVE" is in black, and "AUTOMATS" is in teal. Below this, the words "GENERAL PRESENTATION" are written in a smaller, black, all-caps sans-serif font.

MS DYNAMICS 365 CODELESS AUTOMATED TESTING

Executive Automats speeds up, improves and simplifies the process of creating and executing UI based automated tests. This has been designed to allow testers and non-technical people create complete automated testing suites without any developer assistance.

We did this by making the tool 100% codeless. Anyone who knows a business process, can create sophisticated test scripts and scenarios.

Load and Performance tests

EA Performance testing is the unique tool that enables you to mimic real business user behavior. You can simulate 100's, even 1000's of parallel business process executions to see how your system responds.

Process documentation creator

EA gives you the ability to automatically generate exact process documentation with just the click of a button. Very useful for on-boarding and test documentation requirements.

Zero-coding, flexible and complete test automation

EA can schedule and perform 1000's of tests simultaneously with no coding needed because anyone who knows a process can record it. Testers can then quickly and easily modify and extend scripts, dramatically reducing the time you spend creating, executing and maintaining test scripts

Cross-platform testing

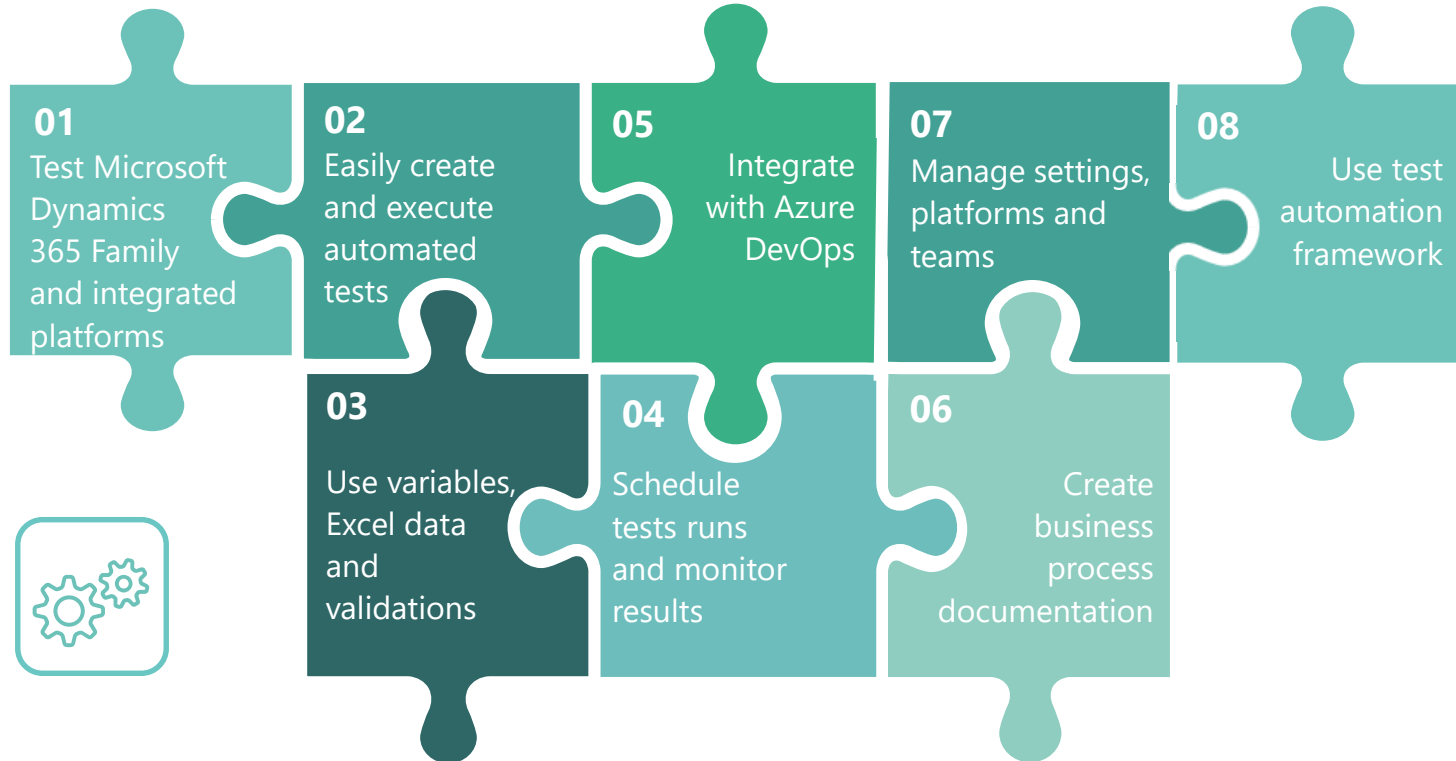

EA works with Microsoft Dynamics 365 Family products and other web-based platforms. You can test end-to-end business processes. Start in D365 CRM or CPOS, move to Finance and Operations and go back to your e-commerce platform to validate data flow and integration.

Test Automation Framework

Involve Subject Matter Experts (MSE) or others who know business processes. Manage their works in a form of Projects, recreate into test scenarios, schedule runs and iterate. All without coding

EVERYTHING YOU NEED TO CREATE COMPLETE AUTOMATED TEST SUITES IN MS DYNAMICS 365

TEST AUTOMATION FRAMEWORK

Executive Automats speeds up, improves and simplifies the process of creating and executing UI based automated tests. This has been designed to allow testers and non-technical people create complete automated testing suites without any developer assistance. We did this by making the tool 100% codeless. Anyone who knows a business process, can create sophisticated test scripts and scenarios.

RECORD BUSINESS PROCESSES

Involve business process owners or use process documentation. Everyone can record it

RECREATE INTO TEST SCRIPTS

Manage business process recordings and recreate into different tests scenarios

PLAN YOUR TESTS RUNS

Group your tests by applications or functions – whatever needed. Schedule tests runs

INTEGRATE WITH AZURE DEVOPS

API integration with few clicks. Trigger tests runs directly from DevOps and report back test results

DOCUMENT AND REPORT

Document test execution steps with screenshots and create business process documentation

ITERATE TO INCREASE COVERAGE

Start with core business processes. Iterate to extend the testing scope and increase test coverage

FUNCTIONAL AND TECHNICAL SUPPORT

Executive Automats Clients get continuous and fast functional and technical support. We respond to enquiries as soon as possible but not later than within 24 hours (usually quicker). We work in European, US and Indian time zones.

Every new customer provided with an extensive, hands-on, **certified trainings**

Functional, **live-support**, with Skype, Teams or emails

European, US and Indian **time-zones** support

Executive Automats **experts** available for **onsite project** to support customer teams

Teams of **developers** to solve technical issues and provide **customizations**
