

- Have you moved to the cloud, only to be underwhelmed by the improvements you were expecting?
- Were you hoping to spend less but are spending as much, if not more, than before?

Our Cloud Review is your first step to a **stronger, faster, more cost-effective** cloud estate.

Many companies encounter stumbling blocks on their cloud migration journey due to its complexity or a lack of in-house resources. No matter where you are on your cloud journey, our insight can help you get back on your feet. Our Reviews are customised to meet your needs, but typically we review the following areas of your estate:

- Resource Usage
- Configuration
- Security
- Reliability
- Cost Optimisation
- Performance and Efficiency Optimisation

Our report will provide you with clear recommendations for improvements, automation, licencing and cost savings, and a post-assessment meeting to answer any questions and next steps. As a Microsoft Gold Partner, we are well placed to help you engage with Microsoft for further guidance or funding.
