Dangerous Goods
Shipping Dangerous Goods with Business Central

Ensure Safe and Compliant Shipping of Dangerous Goods in Business Central. Managing and shipping hazardous materials has never been easier. With our new Dangerous Goods integration for Microsoft Dynamics 365 Business Central, your business can now handle all classifications of dangerous goods efficiently and in full compliance with international regulations.

How Business Central Handles Dangerous Goods

With this solution, Business Central can now store and manage hazardous material classifications, automate compliant shipping documentation, provide instant validation to prevent errors, ensure proper labeling and packaging, and adapt to carrier-specific requirements for seamless transportation.

Key Benefits

- Reduce the risk of non-compliance fines and shipping delays

- Improve operational efficiency by automating Dangerous Goods handling

- Ensure the safety of employees and customers

- Centralize all logistics and compliance data within Business Central
