# Everyday AI Adoption Training
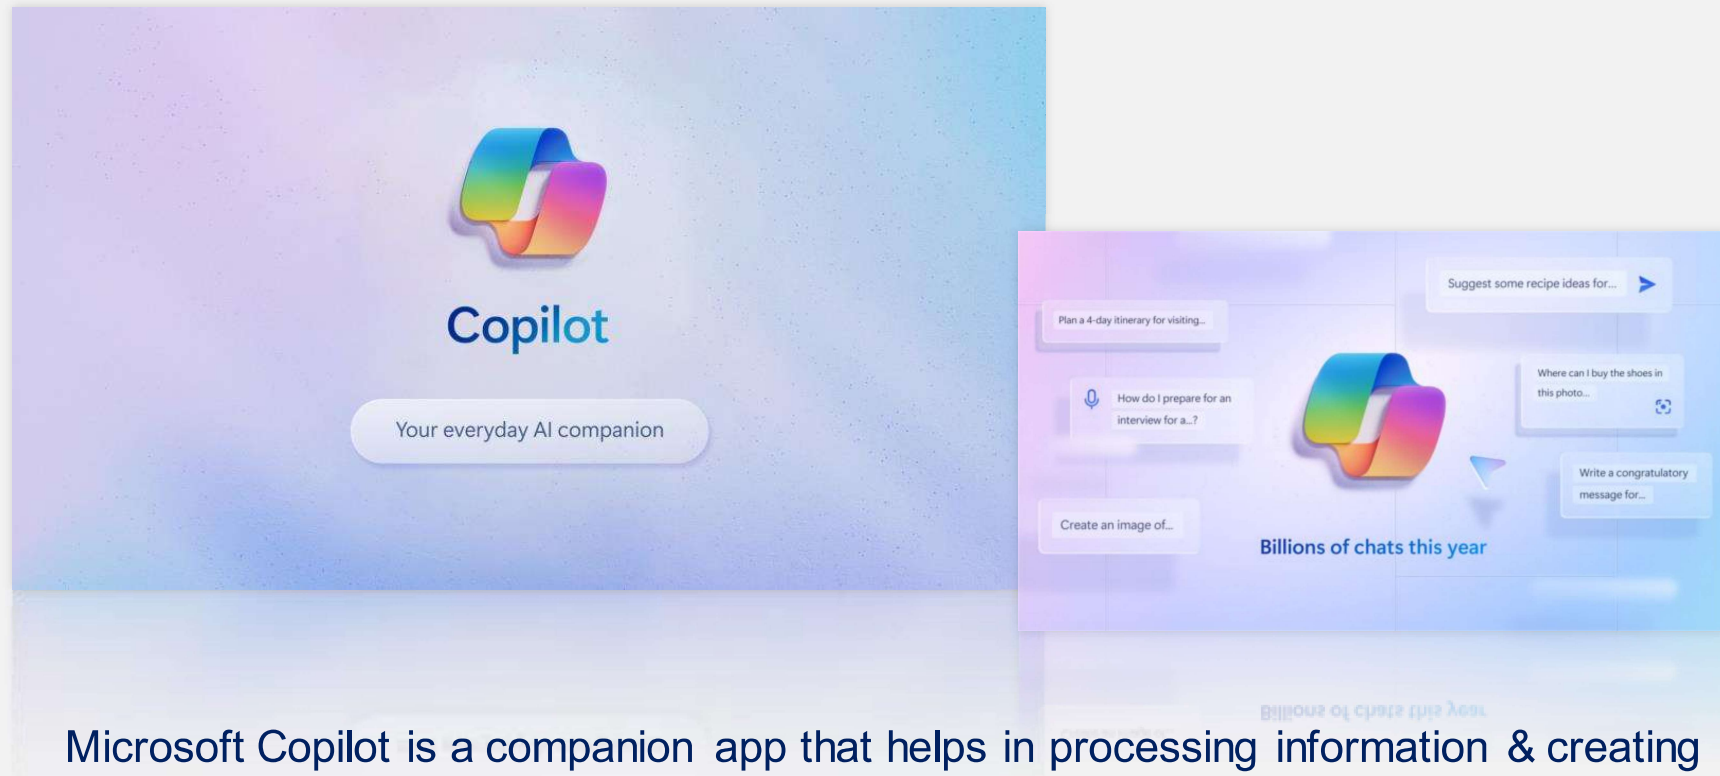

Boost Your Day-to-Day with AI: A Simple Guide to Everyday Efficiency

Xylos

Building blocks in Artificial Intelligence domain.

AI

Computer Vision
Extracts Information and makes decision from visuals quickly

Information Management

Neural Networks
Neural Networks instruct computers to process data like the human brain.

Data driven

Development

Speech Interpretation
Extracts meaning from spoken language for computer processing

Information Management

Communication

Machine Learning
Machine Learning enables computers to learn and perform tasks autonomously

Data driven

Development

Ensuring Quality

Security by design

Ethics by design

Natural Language Processing
Allows computers to comprehend human language

Information Management

Communication

Robotics
Intelligent Robots execute specific tasks in response to human commands

Low Code Domain

Business Automation

Integration

Experts Systems
A computer program that simulates human decision making abilities

Development
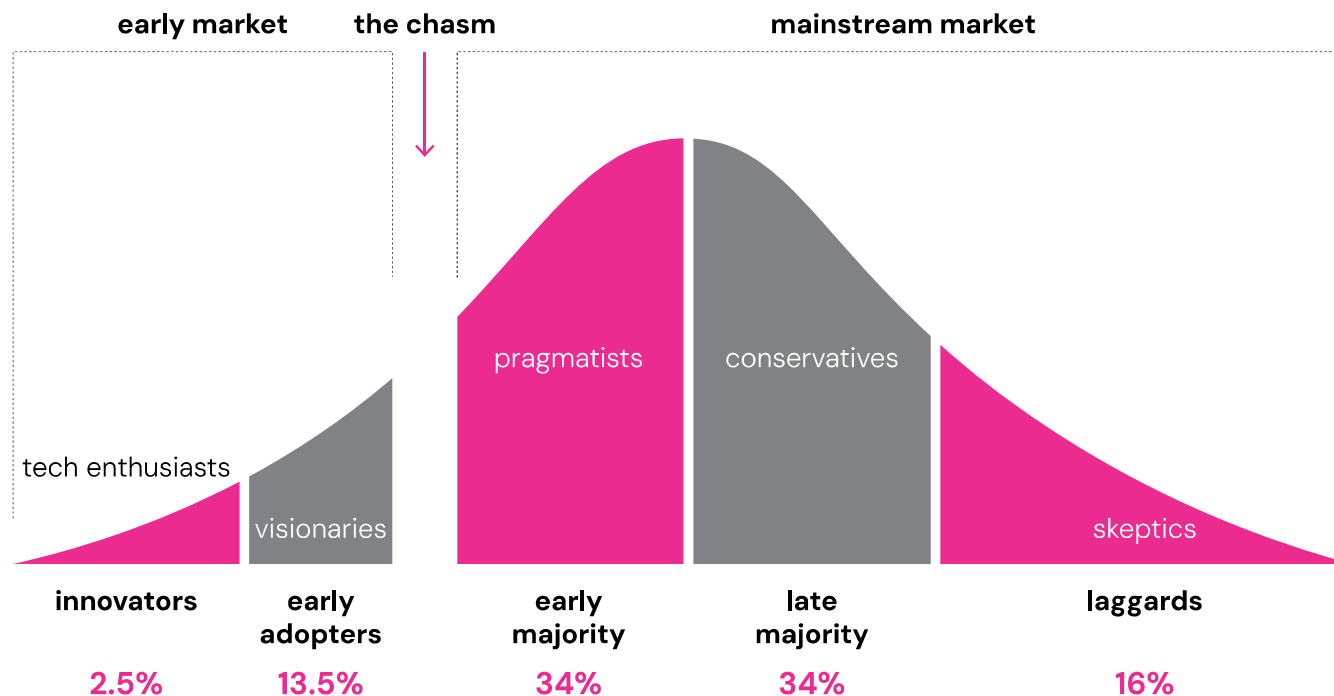

Information Management

Microsoft Copilot

Microsoft Copilot is a companion app that helps in processing information & creating content based on available information in all digital workplace tools of the M365 Suite.

What is the biggest challenge in rolling out AI ?
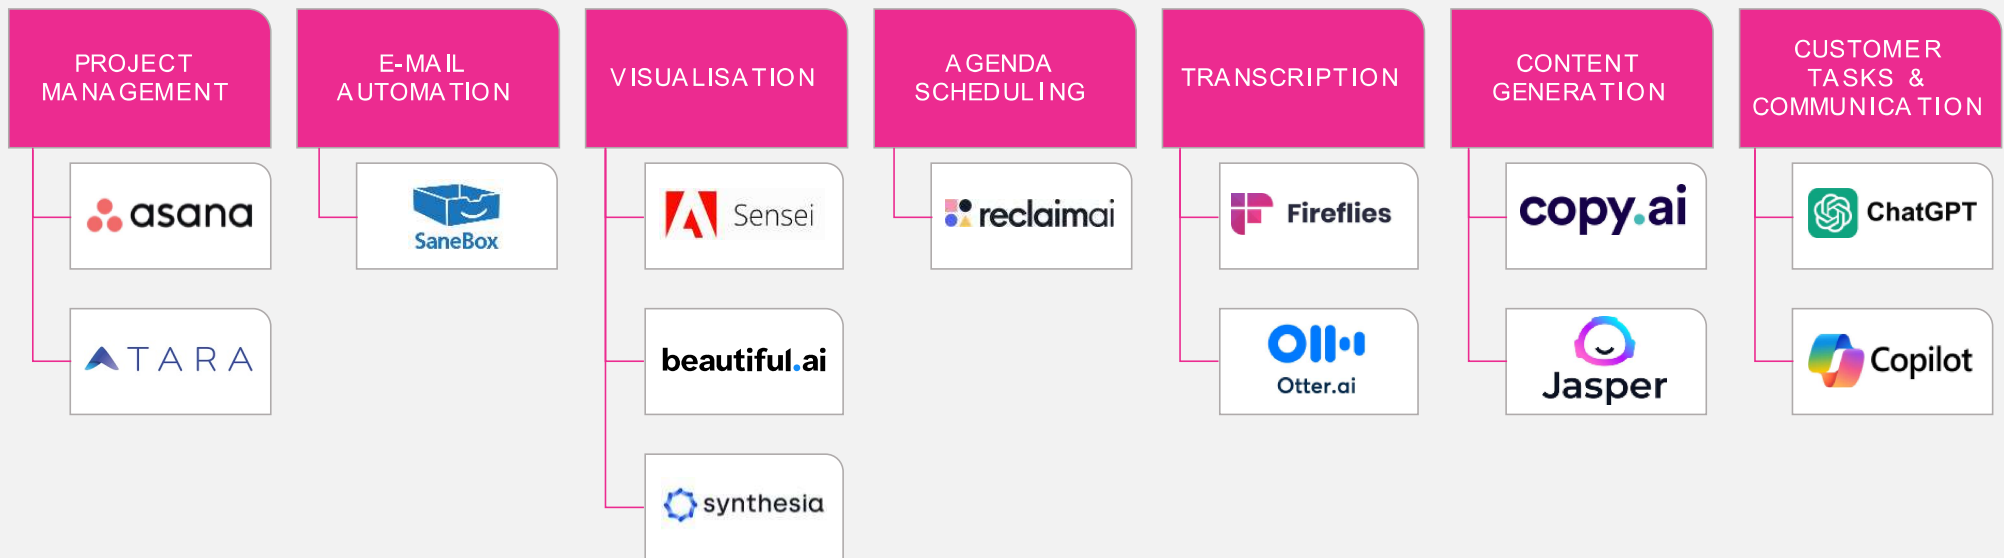

Only 16% will use it out of free will.

early market   the chasm   mainstream market

tech enthusiasts

visionaries

pragmatists

conservatives

skeptics

innovators	early adopters	early majority	late majority	laggards
2.5%	13.5%	34%	34%	16%

Functional Arguments
What can I do with it?
How does this work?

Will it contribute to my work?
Is it safe to use?
Can I trust it?
Is it allowed?

X

What is the biggest challenge in rolling out AI ?

People are not aware of the possibilities

Everyday AI Adoption Training

X

6

AI adoption training package

1 workshop, individual follow-up & 15 copilot licenses: guaranteeing ROI

½ DAY FOUNDATION

- ✓ AI integrity: understanding how AI uses your data
- ✓ Integrate AI into daily routines
- ✓ Replace manual tasks with AI-driven solutions
- ✓ Real-world applications

½ DAY WORKING WITH AI

- ✓ Learn to use AI in everyday apps
- ✓ Examples: Email, spreadsheets, LinkedIn, Teams Chat, Word, PowerPoint
- ✓ Outcome: Streamline tasks and enhance productivity
- ✓ Make AI a valuable part of everyday life

INCLUDES

- ✓ A follow-up call with a trainer of 30' after the training OASE+
- ✓ OASE access 60 days
- ✓ A Microsoft Copilot license per participant (1-year)
