- Faster team Ramp-Up and Ramp-Downs

Customer Success:

Transforming Insulin Management with YASH AMS

Client:
A leading medical device company specializing in insulin management systems headquartered in the USA.

Business Need:
Seeking robust Application Management Services (AMS) support for SAP S/4HANA to streamline ongoing operations.

Solution:
- Deployed a comprehensive AMS framework to support RISE with SAP - SAP S/4HANA, GTS, BTP, SAC, Mobile Start, and more.
- Enhanced ongoing support operations through proactive monitoring, automation, and optimization initiatives.

Benefits:
- Achieved a **cost reduction of 20%** through streamlined support processes and automation
- Increased **operational efficiency by 30%,** reducing resolution times and improving productivity across support teams.

YASH'S BASIS AMS Support Delivers Big Savings for a Leading Farm Equipment Manufacturer

Client:

An American multi-billion corporation that manufactures agricultural machinery, heavy equipment, forestry machinery, diesel engines, drivetrains, and lawn care equipment. They also develop drivetrain components and engines for industrial and marine equipment and generator drives.

Business Need:

Seeking robust Application Management Services (AMS) support to maximize SAP performance, minimize downtime, and optimize resource allocation.

Solution:

- **24x7 support for 350+** SAP systems
- Nearly **200 tickets** weekly
- Successful rollouts in **China, India, and Brazil**
- Initiated batch consistency project for uniform load distribution
- Real-time monitoring of SAP applications worldwide using **SolMan Technical Monitoring**

Benefits:

- Generated up to **$3 MN** ($3,089,601) in cost savings, including server disk and CPU Time savings
- **60% reduction** in resolution time
- Achieved zero tickets in BASIS queue twice out of nearly **200 tickets** weekly
- Reduced shift resources from **9 to 2 post-SolMan** Tech Mon implementation.
- Cut execution time by up to **21 times** for long-standing jobs.
- Cleared **11 million** redundant records, reclaiming disk storage space and driving cost savings.
