

Automate Accelerate Modernize

Migrate Synapse, ADF, and SSIS workloads seamlessly into Microsoft Fabric.

Introduction

Enterprises often struggle with legacy data pipelines and manual redevelopment when moving to modern platforms. The **Fabric Migration Accelerator** from YASH Technologies eliminates these challenges by automating migration of Synapse, ADF, SSIS pipelines and notebooks into Microsoft Fabric, preserving structure, accelerating timelines, and ensuring governance.

Key Offerings

Synapse Pipeline Migration	ADF Pipeline Migration	Synapse Notebook Migration	SSIS Package Migration
Automated conversion with Fabric compatible placeholders, preserving original architecture.	ARM template based migration, replacing ADF components with Fabric alternatives.	AI powered cell level analysis, remediation, and conversion to Fabric ready code.	Parsing SSIS workflows into Fabric Data Factory pipelines with mapped activities.

Migration Architecture

Deliverables you Receive

Fabric Ready Pipelines

JSON format,
Lakehouse placeholders,
normalized structure.

Migrated Notebooks

Converted code, auto
remediated cells, ready
to run.

Summary Reports

Coverage analysis, flagged
components, audit trail of
transformations.

Benefits

60% faster

migration vs manual
redevelopment.

Bulk scale ready

supports large scale
workloads.

Structural fidelity guaranteed

dependencies and
logical flow preserved.

AI assisted resolution

for complex SQL and
scripts.

Seamless Fabric integration

deployment ready
assets.

No code migration experience

unified within Fabric.

Full audit & transparency

detailed reports for
governance.

Why YASH Technologies?

Proven expertise
in enterprise
modernization.

Consultative approach
tailored to your
business context.

Scalable solutions
for complex
workloads.

Transparent, audit ready
processes aligned with
Microsoft Fabric.
