

Microsoft Dynamics 365 Finance & Operations: Development Package

Would you like to get more out of your Dynamics AX/365 Finance & Operations (F&O) solution by adding additional functionality? Domain 6 is your trusted partner to deliver enhancements and improvements to your Dynamics AX/365 F&O solution.

The Domain 6 global team provides comprehensive development services for Dynamics AX/365 F&O that leverage tried and tested deployment best practices. Our development services focus on providing additional functionality or integrations to maximize system utilization and operational efficiency.

Development packages are a block of 80 hours which can be used in a flexible fashion as you see fit with no time limit to consume the hours. These development hours can be used for a range of activities including development, unit testing, developing test scripts, user training documents, responding to user questions, resolving problems, developing automated test scripts using Regression Suite Automation Tool (RSAT) and compliance procedures.

DELIVERABLES

- A Block of 80 Development Hours
- Monthly Utilization Report

Cost: \$4,800

DYNAMICS 365 PARTNER PROFILE: DOMAIN 6

A team of industry experts and technology savvy professionals founded Domain 6 to become one of the leading global Dynamics 365 services providers. After extensive experience in multinational organizations such as Microsoft, CGI, PwC, and other systems integrators and independent software vendors, these leaders came together to fulfill a dream of enabling digital transformation for Dynamics 365 clients.
