YELLOW WAREHOUSE SERVICES

Yellow Solution is an expert partner within Dynamics 365 Business Central, with a focus on logistics and inventory management. Our solution is designed to improve your operational processes and ensure smooth and efficient operation in your warehouse.

SERVICES

Automated inventory management: Implementation of features for tracking, inventory movement and real-time updates.

Optimization of logistics flows: Efficient handling of incoming and outgoing goods, which reduces lead times and improves delivery precision.

Barcode system integration: Improve the accuracy and speed of your inventory management with seamless barcode and scanning technology.

Reporting and Analysis: Create custom reports to monitor inventory turnover, backorders and other important inventory data.

We have also developed our own unique solutions within Business Central that contribute to further efficiencies and automation in warehouse management, especially designed to meet the needs of modern warehouses.

TARGET GROUP

- Companies that want to streamline their logistics and inventory management
- Warehouses that want to reduce margins of error and improve productivity
- Companies with growing or complex inventory needs

KEY FEATURES

- Custom implementations
- Optimization of warehouse processes
- Integration with existing business systems
- Continuous support and training
