# YOBAH

Who we are

We are a team of dedicated consultants with architecture, engineering and development backgrounds.
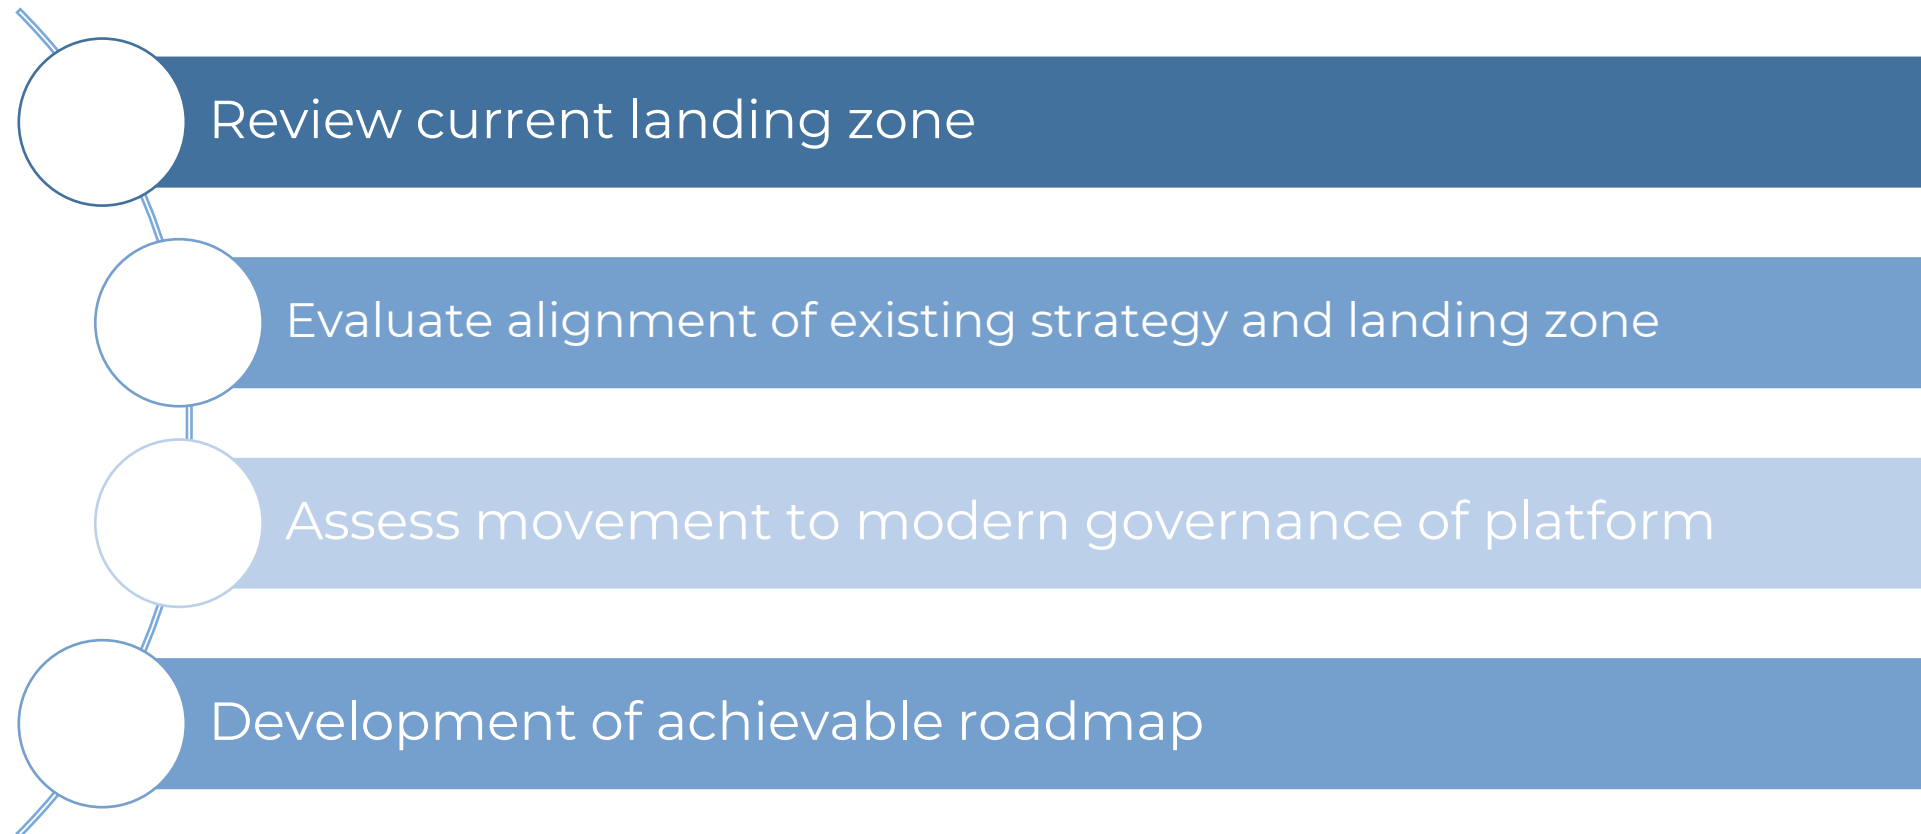

Established 10 years ago, we are committed to creating the right solutions which allow our clients to grow.

Our accelerator program is a fixed price and pre-defined engagement to define and deliver an enterprise scale landing zone within your Azure environment. Split into 3 phases – Review, Design, and implementation.

Strategy review & definition

The first stage of the program is all about reviewing your current situation and working together to build an obtainable and sustainable strategy.

Review current landing zone

Evaluate alignment of existing strategy and landing zone

Assess movement to modern governance of platform

Development of achievable roadmap

Design

Required designs are completed through several tailored workshops led by Yobah's experts with input from your stakeholders.

Alignment to industry standards & policies

Networking design
(segmentation, hybrid, DMZ etc.)

Design of management groups & subscription

Definition of Azure policies

Role based access & administration model

Automation design & tooling framework

FinOps processes & design

Implementation

Once the design phase has been completed Yobah will move forward with the implementation stage

Our TechOps team will build out and deploy the agreed landing zone, writing all relevant scripts & pipelines

Impact assess the management of the landing zone

We will work collaboratively with you to align operating models

Included is an extensive 6-month warranty period

We are confident that by the end of the accelerator program, you will have all of the required tooling and knowledge to migrate into the new landing zone and to deploy any production apps. If you do not have the in-house capabilities or the time to complete this yourselves, then Yobah are happy to assist but it would be completed as a separate chargeable engagement.
