Finigami Document AI

Best-in-class parser for unstructured, handwritten, & vernacular docs

---

Problem

Businesses collect several documents that are often unstructured

Hand-filled forms, legal documents, property docs, KYC documents, utility bills, invoices, NOCs, etc

These are often **hand-written**, in **regional languages**, and are in different formats

They are **processed manually,** which increases operational costs and turn-around-time

Finigami Document AI can

- Extracts data from ANY document
- Supports handwritten forms
- Understands multiple languages
- Can handle variable layouts and formats

Any layout, any document

How to use?

- Integrate our API directly in your application
- Use web interface for testing and manual reviews
- Get data export in JSON, XML, CSV, XLSX
- Bulk processing as well as single document processing supported
- Input formats supported - Images and PDFs

Pricing: Document AI

- Each page consumes credits based on the table below

How to calculate credits usage per page?

Base rate per page	**1 credit**
Verbose documents (>300 words)	**x2**
Non-English language	**x2**
Data localization outside US	**x2**
Complex layout (forms, tables)	**+1 credits**

Pricing Examples

	PAN	Hindi Invoice	Land deed	Bank form
Base credits	1	1	1	1
Verbose	-	x2	x2	x2
Non-English	-	x2	x2	-
Data outside US	x2	-	-	x2
Complex layout	-	+1	-	+1
Total credits	**2**	**5**	**4**	**5**

Data Security & Privacy

We take data security and privacy very seriously

- We are ISO 27001 compliant

- Data localisation in India available on request
- We purge document data immediately after processing
- All your data is encrypted at-rest and in-transit
