

Zafin IO

Introducing Zafin Integration & Orchestrate (IO)

Zafin IO is a **foundational technology platform** that **accelerates integration** between a Bank's ecosystem and Zafin's cloud-native SaaS.

Zafin IO offers accelerators, leveraging well known **design patterns and low-code approaches**, to ease the bank-side application and integration development effort. This enables Bank's to **rapidly simplify core product systems** and **launch new personalized propositions at scale and at speed**.

Our collaborative platform enables developers to **build innovative integration solutions** that enhance a Bank's business capabilities and **drive time-to-value** for their clients. With the support of our implementation team, Zafin IO will **reduce risk in core modernization efforts** while **lowering implementation costs and time horizons**.

Zafin IO empowers the creation and delivery of **cutting-edge solutions that accelerate** and enhance a Bank's core **modernization journey**.

Faster connections to core systems, collaboration tools, and application integrations

Connectors and accelerators

Faster connections to core systems, collaboration tools, and application integrations

Core banking

Utilize a portfolio of pre-built core banking connectors, offering end-to-end observability, scalability, and resiliency

Collaboration

Leverage our collaboration connectors to expose the business capabilities of the Zafin product suite through everyday communication tools such as Microsoft Teams

Applications

Streamline digital workflows for your enterprise by using our application connectors, which directly connect your customer support, sales, and other customer communications with Zafin

Zafin Copilot

Take advantage of Microsoft Azure Open AI-powered, Zafin Copilot, to meet the user in the way they think and communicate: as a conversation
