What we offer

Zanista AI is a London-based company specializing in financial and educational technology. We provide innovative data solutions backed by deep financial expertise and cutting-edge AI research.

- **Quantitative & Technical Analysis** including risk management, portfolio optimization, trading strategy back-testing engine, and more.
- **Providing Alternative Financial Data** news and financial data processed with Generative AI at large scale
- **Research Analysis** Identify and process the most relevant scientific articles and provide topic-specific literature review.

Quantitative & Technical Analysis

Our **Quantitative Analysis Services** include (but are not limited to):

- **Risk Management:** Identifying, measuring, and mitigating financial risk.
- **Back-Testing Trading Strategies:** Validating algorithmic strategies on historical data with our strategy back-testing engine.
- **Accuracy Measurement:** Evaluating predictive models with real market data.
- **Portfolio Optimization:** Fine-tuning asset allocation to optimizing risk/returns.
- **Portfolio Modeling:** Building robust models using machine learning techniques.

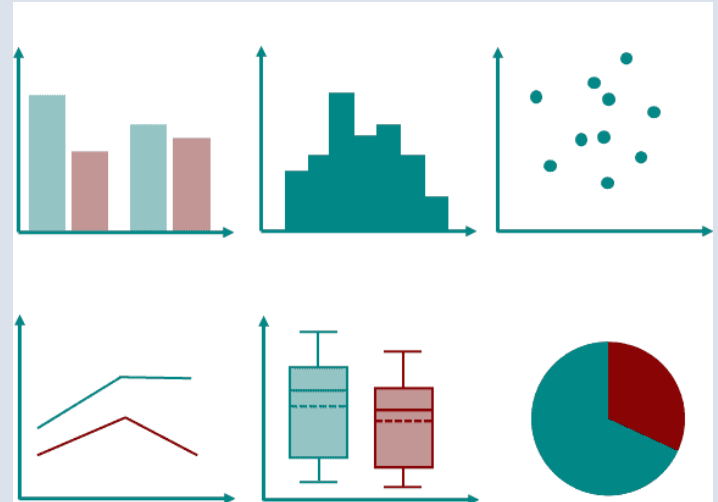

Alternative Financial Data

We **quantified financial news impact** and generated a tailored financial newsletter

- News and financial data processed with Generative AI.
- Currently scanning almost one million articles per day to track stocks in the Russell 3000.
- Possibility of adding custom tickers.
- Delivers market-relevant signals and helps quantify news impact for alpha generation.

Use Cases:

- **Most explainable sentiment** on the market, trusted by hedge fund clients to see not just the sentiment for each company but also the how and why behind it.
- **Alpha generation** with quantified impact of news signals

Research Analysis

By defining a topic and specifying keywords, our AI-powered research tool:

- Finds the most relevant publicly available scientific articles.
- Processes thousands of papers and rank them based on their impact.
- Create up-to-date literature reviews containing summary and key findings of each paper.
- Examples of our AI research tool → <https://zanista.ai/paperpal>
