Zensar's Cloud Migration solution with ZCloudStrategics Framework

Zensar is a leading digital solutions and technology services company that specializes in partnering with global organizations across industries on their Digital Transformation journeys. Zensar has a global footprint and worldwide presence in US, Europe, Africa, and APAC with over 35 sales and delivery locations across industries.

See what customers are saying:

"We were delighted to have Zensar as a trusted migration partner. Their comprehensive cloud migration solution helped us transition to a highly intelligent, comprehensive and agile unified hybrid cloud infrastructure. The team worked closely with us and used the best practices and industry standards in the implementation and execution phases. Today, we can take advantage of economies of scale, global reach, and set the foundation for innovation for our business through cloud."
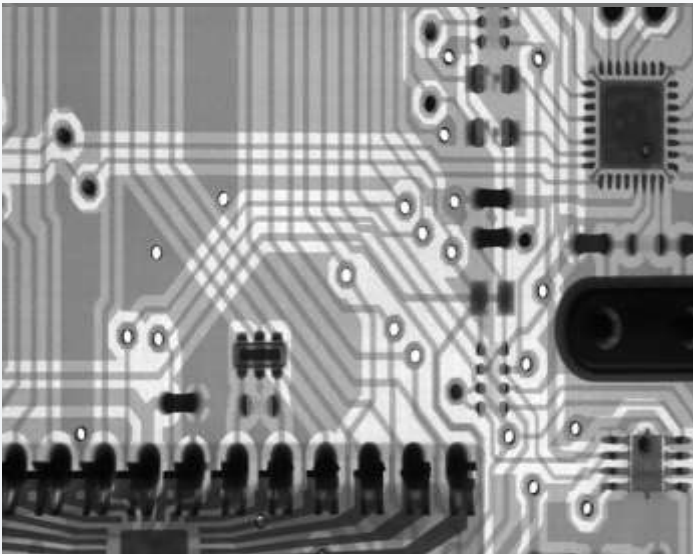

– CIO, Fintech firm

WHAT WE OFFER

Zensar Cloud Migration with ZCloudStrategics is a comprehensive migration solution to migrate customers' data center and application estate to Azure using the Azure Migrate service which takes out the complexity involved in refactoring, reworking, talent re-skilling, environment lock-in, and reduces operational costs by 50%.

The solution leverages the following Azure services to build a customized end-to-end migration strategy -

1. **Azure Landing Zone:** To create an azure environment to enable application migrations and greenfield development at an enterprise scale in Azure.
2. **Azure AD Connect:** To migrate on-prem AD for secure authentication and common identity for accessing both cloud and on-premises resources.
3. **Azure Migrate:** To execute the technical pillar of the migration strategy.

Our solution is differentiated by our **Intelligent Migration Accelerator** which integrates mature OEM tools (Oracle Golden gate, Zerto, Hycu, ARM Templates, and Azure landing zone) and Terraform modules into the on-prem infrastructure estate to automate and measure workload agnostic migration via CSFs and KPIs at every stage. This logically supports our interdependent frameworks like ZenEnguage and Zappintellect Frameworks to input deliverables to the ZenTCO Framework resulting in a comprehensive adoption approach with a detailed project plan, associated resource loading, required tools fabric, and cost broken down into individual milestones for consumption by IT stakeholders.

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
