Zensar's Disaster Recovery with Zerto in Azure

Zensar is a leading digital solutions and technology services company that specializes in partnering with global organizations across industries on their Digital Transformation journeys. Zensar has a global footprint and worldwide presence in US, Europe, Africa, and APAC with over 35 sales and delivery locations across industries.

WHAT WE OFFER

Zensar's DR on cloud solution will take use of Azure's hyperscale capabilities, comprehensive DRaaS, and easy-to-use cloud platform. Our solution will integrate with the following Azure components:

vNET and NSG – Always-on virtual network in the selected Azure region with multiple subnets. Inbound and outbound access for the applications, databases on specific ports. Site-to-Site VPN between production and recovery regions.

Azure Storage – Customer's recovery region will have Blob, block and file share storage.

Azure VM (ZCA) – Zerto Cloud Appliance VMs will be deployed in both production and recovery regions and will spin up VMs during a disaster.

Azure Traffic Manager – For traffic diversion to the recovery region in case of a disaster event.

Azure Load Balancer – To manage the traffic and diversion in case any VM goes down.

Virtual Machine Scale Sets - To scale VMs on-demand.

Azure Monitor – For telemetry and analytics of recovered VMs.

Zensar's DR in Azure is differentiated by:

- Reliable DR orchestration with 1-click provisioning
- RTOs and RPOs in minutes
- Unlimited supported tests & 2 freebie drills.

See what customers are saying:

We are delighted to have Zensar as a trusted DR partner and advisor. It's critical to be able to test on an isolated network without causing any disruptions; this provides us more confidence in making modifications before deploying them in production. Their solution's overall performance is stunning. It complies with our stringent SLAs and is simple to operate. Our team was able to efficiently manage our disaster recovery operations after only minutes of training..

– CTO, Retail firm

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
