# Zensar's Hybrid Cloud Backup solution in Azure

ABOUT ZENSAR:

Zensar is a leading digital solutions and technology services company that specializes in partnering with global organizations across industries on their Digital Transformation journeys. Zensar has a global footprint and worldwide presence in US, Europe, Africa, and APAC with over 35 sales and delivery locations across industries.

See what customers are saying:

We were delighted to have Zensar as a trusted backup partner. Their comprehensive hybrid cloud backup solution helped us transition to a highly intelligent and centrally monitored backup infrastructure. The team worked closely with us and used the best practices and industry standards in the implementation and execution phases. Today, we have more control over our data protection strategy and can recover in a matter of seconds.

– CIO, Hitech Manufacturing firm

WHAT WE OFFER

Zensar Hybrid Cloud Backup-as-a-Service extends the on-prem backup estate to cloud with three Azure backup data tiers – snapshots, vaults and archives (LTR). It reduces maintaining unified access path to the data through Initial full estate backup, followed by incremental and transaction log backups. The solution leverages the following Azure features along with pre-existing on-prem backup vendor tools to provide a strategic hybrid cloud backup foundation -

1. **Azure LRS or GRS or ZRS**: These redundancy options provide you with highly available data storage capabilities of at least 12 9s.

2. **Azure Recovery Services Vault (Management Plane)**: Vault provides an interface for the user to interact with the backup service.

3. **Azure Backup managed storage**: Customer's Azure subscription will have Blob, Block and File share storage for data plane backup.

4. **Azure vNET and NSG**: Always-on virtual network in the selected Azure region with multiple subnets. Inbound and outbound access for the applications, databases on specific ports. Site-to-Site VPN between On-prem and Backup regions.

Zensar's Hybrid Cloud Backup is differentiated by its agility and the flexibility to work with any storage technology and any workload as per

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
