SQL Server Lift and Shift to Azure

Data & BI

On-prem SQL Server can be costly and inflexible

Our **Lift-and-Shift SQL Migration to Azure** moves your databases to **Azure SQL Managed Instance or Azure SQL Database**, ensuring minimal disruption and maximum reliability →

WHAT'S INCLUDED

- A detailed assessment of your SQL Server environment
- Compatibility checks and remediation planning
- A customised migration plan with downtime and rollback strategies
- Full lift-and-shift migration, performance tuning, and backup validation
- Optional hybrid connectivity setup

WHY IT PAYS OFF

- Reduced operational overhead with managed cloud services
- Improved uptime, automatic backups, and elastic scalability
- Flexible, serverless pricing options that evolve with your needs

£5,000 per server, get in touch →

Cost varies with complexity
