

Microsoft Copilot Enablement – Strategic Consultation & Phased Rollout

Copilot

Is your business ready to unlock AI- powered productivity?

From governance and compliance to automation and custom AI agents, Zenzero's structured Copilot adoption program helps organisations plan, pilot, and scale Microsoft Copilot across Teams, Microsoft 365, and Azure AI. →

WHAT'S INCLUDED

- Assess readiness: security, licensing, compliance, and infrastructure.
- Define governance and change management for Copilot adoption.
- Deploy AI-powered features in Teams Premium for smarter meetings and collaboration.
- Roll out Copilot in Word, Excel, PowerPoint, Outlook, and OneNote to boost productivity.
- Automate workflows with Copilot Agents for operations and support teams.
- Empower departments to build custom AI assistants with Copilot Studio.
- Extend capabilities with Azure AI Services for advanced analytics and bespoke solutions.

WHAT YOU GAIN

- A risk-managed roadmap for Copilot adoption.
- Faster, smarter meetings and improved collaboration.
- Productivity gains through AI-driven document creation, data analysis, and reporting.
- Tailored AI assistants and automated workflows to streamline operations.
- Future-proof AI architecture that scales with your business.
