

# Power Platform Automation Accelerator

Dynamics 365

## Unlock agility and scale with the Power Platform Automation Accelerator

We rapidly deliver low-code apps, intelligent workflows, and data-driven insights that dramatically reduce manual effort, boost productivity, and accelerate decision-making. The fully governed solution empowers both IT and citizen developers to innovate securely and consistently across your organisation →

### WHAT IT DOES

Targeting the same capabilities as Dynamics 365 Implementation Package, this offering emphasises:

- Custom connectors and third-party integrations
- Emphasis on analytics alongside automation
- Built-in training for scalability

### FULL DELIVERABLES

- Business process roadmap
- Power Apps and Automation flows
- Data connectors and documentation
