

SharePoint Tiered Storage & Archive Optimisation

Data & BI

SharePoint usage grows fast – and so do storage costs

Zenzero's **SharePoint Tiered Storage & Archive Optimisation** identifies inactive content for archiving, improving site performance and reducing unnecessary spend →

WHAT WE DO

- Conduct a discovery and usage analysis of your SharePoint environment
- Identify aged or infrequently accessed files for archiving
- Implement tiered storage across SharePoint Online, OneDrive, and Azure Blob
- Provide governance documentation and user guidance

THE GAINS

- Lower storage costs and faster performance
- Secure, governed access to archived content
- Compliance with data retention and regulatory policies
