

UEM Assessment and Optimisation Service

The modern workplace is evolving

The top endpoint management challenges experienced by organisations are:

Endpoint diversity

Due to the move from a single corporate-owned device to multiple and BYOD devices.

Employee experience

With expectations rising and employee satisfaction increasing in importance.

Distributed workforces

Creating an update management headache as devices rarely connect to the corporate network.

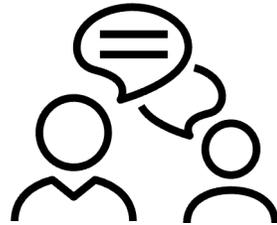

Rapid rise of cyberthreats

Increasing breach sophistication and volume requiring changes in the approach to cybersecurity.

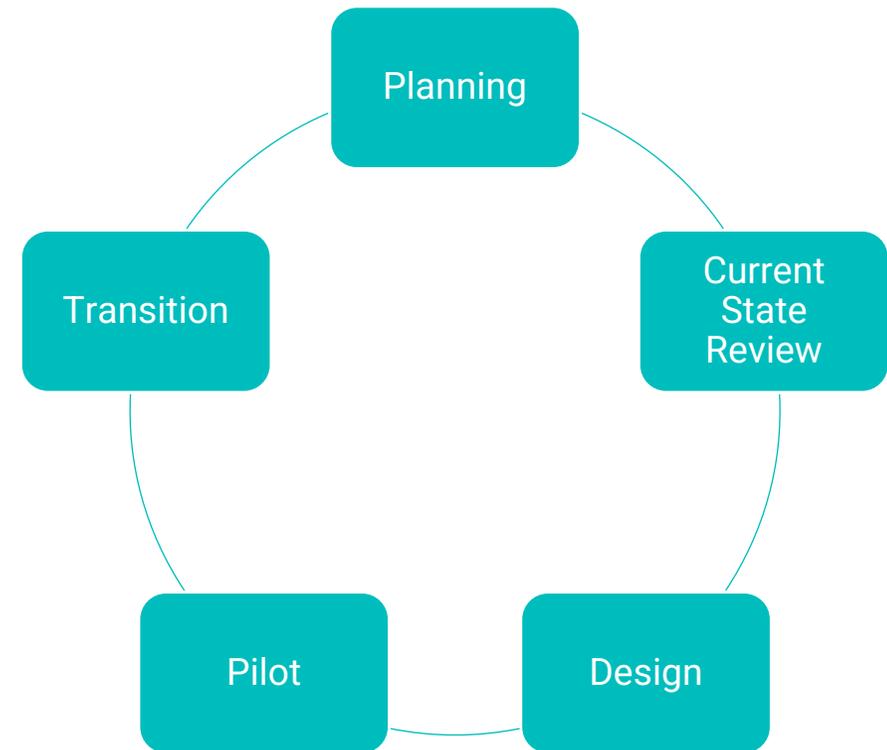

Zetta's EUM Assessment Service

We will design and pilot a modern, unified endpoint management solution allowing you to manage all your corporate devices regardless of where they are, both on and off your network.

Zetta's EUM Assessment Service

We'll help you understand your current devices landscape and create a high level architecture and detailed design document to modernise your endpoint management.

EUM Benefits

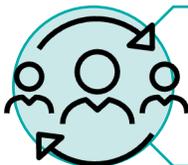

Improved visibility across all endpoint devices and connected networks

Enhanced IT security with centralised policies and management

Improved user experience with new devices set up for use out of the box and apps automatically deployed

Reduced IT overhead costs and hardware expenses through automation of several IT processes and tasks

Deliverables

The 8-week engagement will produce the following deliverables:

- Unified Endpoint Management detailed design document
- Unified Endpoint Management Pilot (10 users and devices)
- As-built document

Why Zetta

WA headquartered

Our team is WA based and available to help WA businesses

Microsoft experts

We specialise in designing, implementing and managing solutions based on Microsoft technology

Agile

Owners and directors work in the business, we can make decisions fast

Customer focused

We truly value your business, becoming an extension of your team, we listen, and we respond, fast

Highly skilled

We focus on hiring and retaining some of the best in the business

High customer satisfaction

All our clients, past and present, are referenceable sites

Simplifying a complex world
