

# IAM Assessment and Optimisation Service

---

# The modern workplace is evolving

Blurring the barriers between who is in and out of your network creating the following challenges:

## Endpoint diversity

---

An explosion of apps, devices, and users across and outside of the corporate network.

## Enhancing employee experience

---

Demands for increased productivity and IT modernisation, enabled by identity.

## Distributed workforces

---

Putting more pressure on IT to enable flexible and productive experiences for distributed workforces while still securing user access.

## Rising identity attacks

---

Increasing breach sophistication and volume requiring changes in the approach to cybersecurity.

# Zetta's IAM Assessment Service

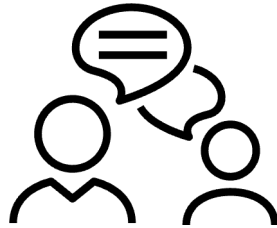

---

We will assess your organisation's identity posture and create a high-level architecture, design, recommendations and roadmap that will help you manage and secure all your users and access to all your apps.

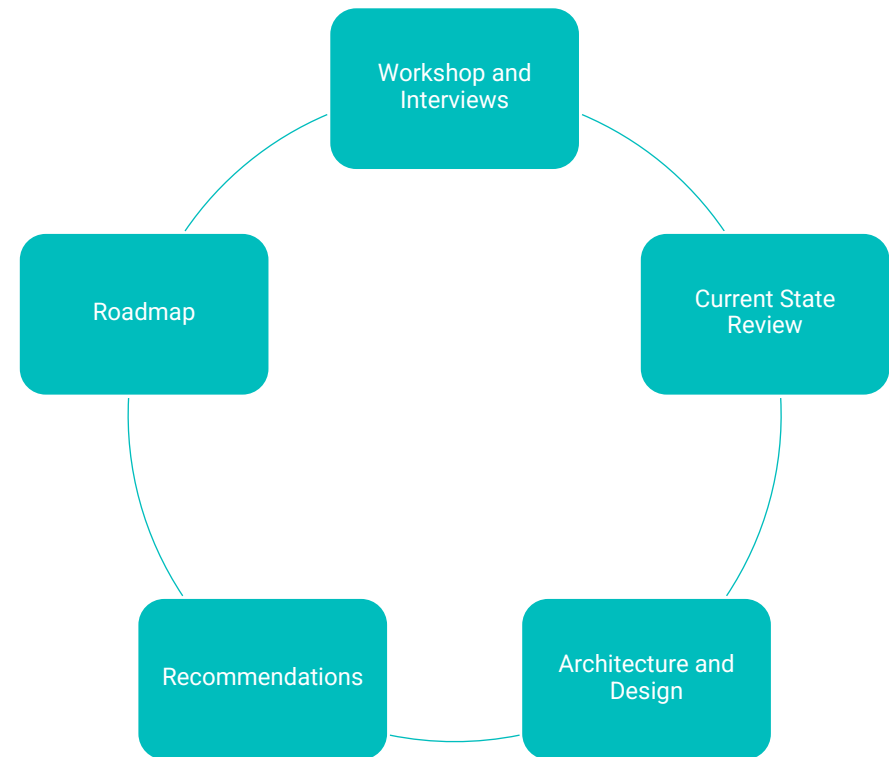

# Zetta's IAM Assessment Service

---

We'll help you understand your current identity security posture and create a high level architecture and design document to modernise your identity and access management.

# IAM Benefits

---

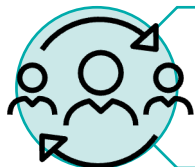

Better visibility of all users and access to all apps

Secure remote access

Improved user experience with agile authentication and authorisation

Improved governance and strengthened privileged access management practices to prevent breaches

# Deliverables

---

The 4-week engagement will produce the following deliverables:

- High-level architecture and design document
- Recommendations and roadmap document
- Recommendations and roadmap workshop
