Redact Ai

## Human-in-the-Loop (HITL) Review

Enables users to review identified PII elements & confirm or modify redactions before final processing.

### Quick Redact

Predefined PII elements (names, addresses, SSN) with a single click.

### Audit Trails

Maintains logs of all redaction activities for compliance tracking

## Key Features

### Batch Redaction

Process multiple documents simultaneously for efficiency.

### Custom Redact

Allows users to select specific information elements for redaction or define custom redaction criteria.

### AI-Powered Detection

Uses advanced AI & Natural Language Processing (NLP) to accurately identify PII.

### Visual & Searchable Redaction

Redacted areas are visually masked, & content is removed from search indexes.

## Workflow

### Quick Redact

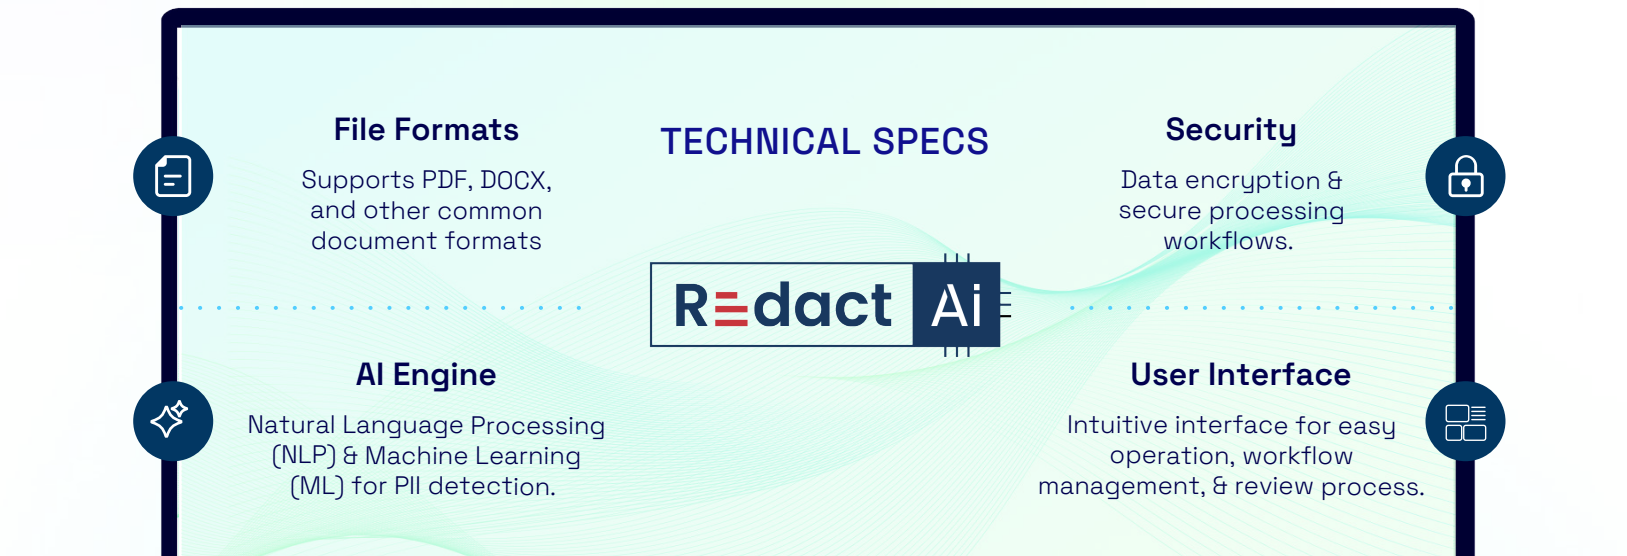

Fast-track standard document redaction using built-in PII rules, followed by optional HITL review.

### Custom Redact

Precisely control redaction in complex files with user-defined patterns (regex) and HITL validation.

## USE CASES

### Legal Document Handling

Redact client information and sensitive details from legal documents with review & confirmation.

### Healthcare Information

Ensure HIPAA compliance by redacting patient data and confirming redactions.

### Financial Documents

Secure account numbers and transaction details with a review step.

### HR Records

Protect employee PII in personnel files and related documents with manual verification.

### Public Records

Redact PII before public disclosure of documents, ensuring accuracy through manual review.

## ZCS BENEFITS

**Enhanced Privacy**

**Compliance Assurance**

**Increased Accuracy**

**Increased Efficiency**

**Reduced Risk**

**Flexible Workflows**
