

ZIOSET

End-to-End Asset Management & Optimization

Track, manage, and optimize your IT & physical assets seamlessly with Zioset's AI-powered asset management solution.

Key Challenges in Comprehensive Asset Management

Lack of real-time visibility leads to asset misplacement and inefficiencies.

Difficulty tracking diverse assets across multiple locations.

High costs due to redundant purchases and poor resource allocation.

Compliance risks from manual tracking and licensing gaps.

Time-consuming audits and fragmented inventory records.

ZIOSET

Zioset is an AI-powered solution for tracking, optimizing, and securing IT and physical assets. It enhances visibility, ensures compliance, and reduces costs through real-time automation.

Zioset Capabilities in Asset Management

Real-Time Asset Visibility

- ✓ Monitor IT & physical assets with a centralized dashboard.
- ✓ Reduce asset misplacement and optimize resource utilization.
- ✓ Gain real-time updates on asset movement, allocation, and condition

QR & Barcode-Based Asset Tracking

- ✓ Assign unique QR Codes & Barcodes to each asset for easy tracking.
- ✓ Simplified inventory audits and reconciliation.
- ✓ Mobile-friendly scanning & cloud-based logging for seamless accessibility.

Compliance & Audit-Ready Reporting

- ✓ Automated audit logs & asset compliance tracking.
- ✓ Customizable reports for asset depreciation, utilization, and software lifecycle tracking.
- ✓ Instant access to asset history, location, and ownership records.

Cost Optimization & Asset Lifecycle Management

- ✓ Reduce asset losses and eliminate redundant software purchases.
- ✓ Track asset depreciation, maintenance schedules, and allocation history.
- ✓ Optimize asset distribution to cut unnecessary costs.

AI-Driven IT Asset & Software Management (SAM)

- ✓ Automated software license tracking to prevent compliance issues.
- ✓ License & audit-ready compliance management with real-time monitoring.
- ✓ Cost savings by identifying underutilized or redundant software.

How Zioset Works: Asset Tracking Flow

Tagging Assets

Each asset is assigned a unique QR Code/Barcode for identification.

Scanning & Logging

Assets are scanned and entered into Zioset's centralized system.

Tracking & Monitoring

Get real-time updates on asset movement, allocation, and utilization.

AI-Powered Insights

Identify underutilized, misplaced, or outdated assets for better decision-making.

Compliance & Auditing

Generate instant reports for audit-readiness & compliance tracking.

Why Zioset for Comprehensive Asset Management?

✓ Multi-Location Asset Tracking

Track and manage IT & physical assets seamlessly across warehouses, offices, and remote sites.

✓ Seamless Integration

Works with existing ERP, ITSM, procurement, and finance systems for smooth operations.

✓ Customizable & Scalable

Adapts to unique business needs with configurable workflows and reports.

✓ AI-Driven Automation

Enables real-time tracking, proactive alerts, and compliance reporting for optimized asset utilization.

Assured Benefits

Improved Asset Lifecycle Management

AI-powered insights for better resource planning & allocation.

Reduced Asset Loss

Enhanced tracking & visibility to prevent loss & misplacement.

Cost Savings

Avoid duplicate purchases & optimize resource utilization.

Compliance Readiness

Stay audit-ready with automated tracking & real-time reports.

Operational Efficiency

Automate audits & reconciliation, reducing manual workload.
