QntrI

...while your IT teams focuses on high-value tasks

Customize

Handle customizations in the browser and backend.

Integrate

Connect to your enterprise systems, like ERPs, payroll and accounting systems.

Secure

Control access privileges, and enable process runs in the cloud while keeping your data behind your firewall.

Empower your business teams to...

Automate

Design responsive forms, build workflows, and automate emails, policies and process checks — all on a drag and drop interface.

Collaborate

Centralize request submissions, access unified information, share feedback, and get real-time status updates.

Optimize

Measure SLAs, analyze trends and bottlenecks, identify anomalies, and iterate to make lasting improvements.
