Azure Express

The Azure Express helps customers early in their journey to cloud.

Microsoft leverages real-time server performance data to determine sizing and cost consumption estimates in Azure.

Customers receive a detailed compute and storage cost consumption estimate identifying candidates for Azure migration.

A closer look at what the Azure Express provides:

Financial Planning

Azure compute and storage cost consumption estimates help customers understand the economics of moving to cloud.

Microsoft Azure and Cloud Profiling

Provide real-time data on server performance to support a more detailed cloud strategy discussion.

What's included

- ⊘ Executive summary of data-driven findings
- ⊘ A detailed inventory of the datacenter environment
- ⊘ Identification and prioritization of candidates to move to Azure
- ⊘ Consumption and storage cost estimates

How to get started

The Azure Express is led by the Microsoft Solution Assessment Team. Contact your Microsoft Account Team or your Partner Account Team to get started.
