

# Zones IoT Smart Infrastructure POC

TAKE REAL ACTION ON YOUR SMART INFRASTRUCTURE VISION BY TESTING ITS SCALABILITY USING AZURE IoT PROOF-OF-CONCEPT (PoC).

**Zones IoT Smart Infrastructure POC** is a service offering that allows you to intelligently and effectively simulate real-world IoT scenarios of smart infrastructure – before implementing a full-stage rollout.

By using **Azure IoT Hub**, you can test and evaluate the capabilities of your digital assets and use the surface data for detailed POC development. The service is designed to help you quickly build a prototype IoT solution to demonstrate the benefits of smart infrastructure to your stakeholders.

It's a highly efficient way to test and evaluate your solution using Azure IoT Hub and Power BI, allowing you to make informed decisions about your IoT strategy and accelerate your time to market.

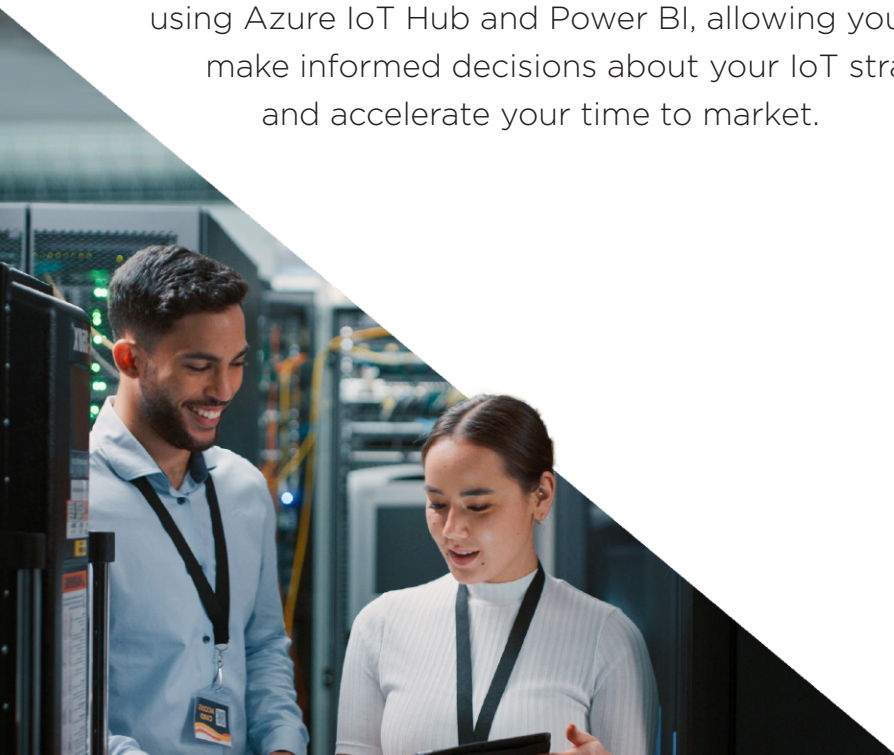

## USING MATURE, BEST OF BREED TECHNOLOGIES, THIS SERVICE HELPS YOU:

- Understand Azure architecture, its components, and functionality
- Translate a technical scenario by demonstrating how to connect IoT devices to Azure IoT Hub
- Use data analytics tools for real-time IoT device analysis and diagnostics
- Demonstrate how you can effectively transform your project using smart infrastructure approach

## BENEFITS:

- Environmental Sustainability: Reduce energy consumption and carbon footprint
- Operational Excellence: Gain visibility into overall operations
- Safety and Security: Provide a secured environment for better public and personnel safety

Consider **IT done.**
