

At Scriptix we are on a mission to make media accessible to everybody. To that end we develop state-of-the-art accessibility services that allow our users to transform audiovisual material into accessible content in the blink of an eye.

By developing our algorithms in house we make sure we keep up with the latest AI trends and offer the best possible service to our customers.

SCRIPTIX

PARTNERS

Looking to integrate Scriptix accessibility services into your own workflow? Say no more, follow our [API Docs](#) to build a seamless integration.

Cloud based

A cloud based solution to effortlessly turn audiovisual content into subtitles or transcripts. Make your content digitally accessible and reach a larger audience.

Privacy focused

Privacy in AI is a growing concern. We only use customer data after opt-in, so never by default. Moreover, users can delete data from our platform at any time.

Customization

We do not believe in a one-size-fits all approach and work together with our partners and customers to bring the best algorithms and functionalities to market.

Features

- ✓ Real-time and batch speech to text service in 37 languages.
- ✓ Highly accurate results thanks to continuous in house development.
- ✓ Translate results into other languages and reach a global audience.
- ✓ Various output formats available: JSON, SBV, VTT, TTML, SRT and WORD.
- ✓ If your filetype is supported by FFMPEG, it's supported by Scriptix.
- ✓ Competitive pay-as-you-go pricing, unlimited users and uploads.

Roadmap

We are continuously innovating and always take suggestions from our users into consideration. Up next for 2024 this is what you can expect:

- UI updates of our transcript and subtitle editors for more professional use.
- Real-time translation: translate a live stream into different languages.
- Auto dubbing: create voice-overs in various languages. Reach a bigger audience.
- Integrations with Teams, OneDrive and Dropbox.
- Login with your Microsoft account.
