Tableau to Power BI Migration

About ZS

ZS is a global management consulting and technology firm established in 1983. With over 13,000 employees across more than 35 offices worldwide, ZS collaborates with companies to enhance life and living standards. By integrating data, science, technology, and human ingenuity, ZS transforms innovative ideas into impactful solutions, aiming to achieve better outcomes for everyone.

OFFER OVERVIEW

Transform your data analytics capabilities by seamlessly migrating from Tableau to Power BI with ZS's advanced migration asset. Leveraging Agentic Flow and pre-built migration tools, our solution ensures a smooth, automated conversion process, reducing manual effort and minimizing errors. Gain clear insights with dynamic text-based summaries, effortlessly transfer data with Power BI export functionality, and enhance your data analysis with CoPilot's advanced capabilities.

Experience a 50% efficiency gain during your migration process and build the right semantic model for seamless integration and use. Don't let migration challenges hinder your productivity—choose ZS's Data and AI Migration Services to unlock the full potential of Power BI and drive better business decisions.

ZS BENEFITS

Decrease XML Conversion Time

Agentic Flow converts Tableau XML to Power BI XML in less than 15 minutes. This rapid conversion significantly reduces the time and effort required for the migration, allowing organizations to transition more quickly and efficiently.

Build the Right Semantic Model

After analyzing the model in Tableau, a semantic model is created in Power BI. This ensures that the data structure and relationships are accurately represented in the new environment, facilitating seamless integration and use of the migrated data.

Output Summary

Post-migration, an agent provides a summary of what was converted versus areas where conversion struggled or was potentially incorrect. This summary helps identify any issues that need to be addressed and ensures that the migration process is thoroughly documented and understood.

Tableau to Power BI Migration

ZS's Data and AI Migration Asset efficiently accelerates the transition from Tableau to Power BI by leveraging Agentic Flow to convert Tableau XML to Power BI XML in under 15 minutes. This solution enhances data insights, reduces migration time, and achieves a 50% efficiency gain, making it ideal for business functional leads and Enterprise IT teams.

CAPABILITIES

Leveraging Agentic Flow and Pre-built Migration Assets

ZS Migration Services offer a seamless, efficient transition from Tableau to Power BI by leveraging Agentic Flow and pre-built migration assets. This approach ensures a smooth and automated conversion process, minimizing manual intervention and reducing the risk of errors.

Providing Dynamic Text-Based Summaries

The service provides dynamic text-based summaries for clear insights during migration. These summaries help stakeholders understand the progress and status of the migration, highlighting any issues that need attention, and ensuring transparency throughout the process.

Enabling Power BI Export Functionality

ZS Migration Services enable Power BI export functionality for effortless data transfer. This capability simplifies the movement of data from Tableau to Power BI, ensuring that all relevant information is accurately and efficiently transferred.

Utilizing CoPilot for Data Analysis

The service utilizes CoPilot for data analysis, improving data insights. CoPilot's advanced analytical capabilities enhance the quality and depth of insights derived from the data, enabling better decision-making and more effective use of Power BI's features.

Ensuring Seamless Integration and Use

After analyzing the model in Tableau, a semantic model is created in Power BI. This ensures that the data structure and relationships are accurately represented in the new environment, facilitating seamless integration and use of the migrated data.
