DevOps Rapid Assessment

*Are you **faster** than your competitor?*

*Do you want to **get stuff done** and out there with customer **value,** better **quality** and higher **security**?*

Benchmark your cloud development and operations practices against Zure DevOps practices.

Let us share our vast experience on how development and operation of cloud applications should be done. We have already done it for more than decade.

*Zure can provide an **actionable roadmap** for you to get better in DevOps.*

THE PROJECT

Over the course of four weeks, our DevOps experts gather information on your *current and desired state* of Development and Operation practices, processes, tooling, environment and culture.

We do this with a questionnaire, 1-to-1 interviews and by facilitating workshops.

We provide a gap analysis report and present our improvement suggestions in a handover workshop.

THE PURPOSE

- Establish baseline for improvement in your DevOps.
- Understand where your development bottlenecks and operations inefficiencies currently are.
- Define where your next level should be and get a clear plan on how to get there.

NEXT STEPS WITH ZURE

- *Roll-out* well-managed Azure DevOps / GitHub environment.
- *Optimize continuous deployment* practices.
- *Optimize DevSecOps* practices.
- Train your teams into Azure DevOps and GitHub.
- Implement *Deployment Acceleration* discipline using Microsoft Cloud Adoption Framework.
- Implement *Security baseline* discipline using Microsoft Cloud Adoption Framework.
